KING PREDICTS WAVE OF PROSPERITY FOR COAST

British Election Fight Enters Final Stage

ABOUT 1,400 CANDIDATES PUT IN NOMINATIONS FOR BRITISH COMMONS TO-DAY

Postmaster-General Hartshorn Only Member of Cabinet Returned Unopposed; Stanley Baldwin Also Returned; Sixteen Conservatives, Nine Laborites and Five Liberals Given Acclamations; T. P. O'Connor, "Father of House of Commons," Among Those So Honored

London, Oct. 18.—Nominations of the candidates for the Commons in the general election to be held October 29, were made to-day throughout Great Britain and Northern Ireland. It is calculated the candidates number about 1,400.

It is noteworthy that the Liberals nominated about 100 fewer than in the last election, while Labor has about 100 more than on that occasion, totaling over 500. This is the biggest effort the Laborites have yet made.

The number of women seeking election grows steadily with every general election. As against thirty-four last December, there are forty-one now. Twenty-one of the women are on the Labor ticket, twelve are Conservatives, seven Liberals and one Independent.

There are 615 seats in the House of Commons.

ELECTED BY ACCLAMATION

Speaker J. H. Whitley was returned by acclamation for Halifax.

The following were elected by acclamation:

CONSERVATIVES

Former Premier Stanley Baldwin, Bedfordshire, Worcestershire; H. D. King, South Paddington; J. M. Erskine, St. George's Division, West; Minister, Hon. P. S. Jackson, Howdenshire, East Riding of Yorkshire; Lloyd Stanley, Pydie division of Lancashire; Sir Leslie Scott, Exchange Division, Liverpool; Captain H. Dixon, East Belfast; T. Moles, South Belfast; T. Sinclair, Queen's University, Belfast; Rt. Hon. E. F. L. Wood, Ripon Division, Yorkshire; West; Hon. C. G. Grenfell, City of London; Sir Vansittart Bowater, City of London; Colonel M. Wilson, Richmond Division, Yorkshire; George H. B. Morris, Cardiff, Wales. Total, five.

LABOR MEMBERS

Charles Edwards, Bedfordshire; Monmouthshire; Rt. Hon. Vernon Hartshorn, Oswestry, Shropshire; G. H. Hirst, Wentworth Division of West Riding of Yorkshire; George Barker, Aberdare, Monmouthshire; Col. Watts Morgan, East Rhondda; John Jenkins, Neath Division of Glamorganshire; Evan Davis, Ebbw Vale, Monmouthshire; P. Hall, Normanton Division of West Riding of Yorkshire. Total, nine.

LIBERALS

Travelling Thompson, West Middlesex; Sir A. Sinclair, Caithness and Sutherland, Scotland; Rt. Hon. Ian Macpherson, Ross and Cromarty; Sir Robert Hamilton, Orkney; R. H. Morris, Cardiff, Wales. Total, five.

ADAMANTLY

Travelling Thompson, West Middlesex; Sir A. Sinclair, Caithness and Sutherland, Scotland; Rt. Hon. Ian Macpherson, Ross and Cromarty; Sir Robert Hamilton, Orkney; R. H. Morris, Cardiff, Wales. Total, five.

SPANISH AND MOORISH LEADERS

General Primo De Rivera (left) is Military Dictator of Spain and Abd El Krim (right) is chief of the Rifian tribesmen who are fighting the Spanish forces in Morocco. Since Rivera seized office a year ago last September the Spaniards have made practically no headway against the tribesmen and have suffered several costly reverses. Predictions are numerous it will not be long until the Rivera administration is overthrown.

LLOYD GEORGE EXPLAINS ISSUES BEING FOUGHT OUT IN BRITISH ELECTIONS

By David Lloyd George
Former British Prime Minister

Special Dispatch to The Victoria Times. Copyright 1924. Reproduction in whole or in part prohibited. Copyright in Great Britain by London Chronicle.

LONDON, Oct. 18 (By Cable).—It is difficult for those who are engaged in a battle to present a clear, and almost impossible for them ever to give an impartial account of it, even after the fight is fought and won.

How can one be expected to do so when the struggle is raging and he himself is one of the combatants?

Nevertheless, there are certain features of this combat which may be recorded with confidence, even now, before the issue is determined.

One is the bewildering effect of the three-party system on the grouping of the belligerent parties. At the last election, Liberal and Labor directed the heaviest fire on the Conservative position. The dominant issue of that election was then free trade or protection. If the Tories had won, a general tariff would have been set up and Britain would, for at least a generation, have become a protectionist country. Then the last citadel of free trade would have been stormed and the world would have presented the spectacle of an unbroken series of nations engaged in a tariff war against each other.

TARIFF HARD TO GET RID OF

It is easy to say that the following election would have resulted in a verdict which would have ensured the reversal of this policy. There is no example of such revocation. Once the tariff had been set up, industry would have done its best to adapt itself to the new conditions—the old industries, built on the free trade basis, would have collapsed and new industries, reared under the shelter of the tariff wall, would have grown. New vested interests would have been created.

CONSTABLE'S DEATH IS INVESTIGATED

I. M. MacDonald of R.C.M.P. Was Drowned in Arctic Ocean

Edmonton, Oct. 18.—While it is stated no suspicious circumstances are associated with the death of Constable Ian M. MacDonald of the Royal Canadian Mounted Police, news of whose death by drowning in the Arctic was received here Wednesday, Captain Klengenberg, owner of the schooner Maid of Orleans, from which MacDonald disappeared, is being detained pending an investigation.

Sergeant Barnes and Constable Brackett have been sent to Coronation Gulf to obtain additional evidence, and if possible to recover the body.

ELECTORS OF YALE HEAR ADDRESSES

Campaign in Riding is Leading up to Federal By-election on November 6

Penticton, B.C., Oct. 18.—With voting in the Yale Federal by-election less than three weeks away, the electors are commencing to take a keen interest in the fight between Mayor W. D. Sutherland of Kelowna, Liberal, and Grote Stirling, Conservative, contestants for the right to succeed the late J. A. MacKeville, Conservative.

The campaign is not expected to reach its height before the appearance in the constituency at the end of next week of Premier King and the Federal Ministers who are accompanying him on his Western tour. From that time until the vote is cast on Thursday, November 6, it is expected both sides will put forward their best efforts to win.

With Hon. R. J. Manion, Conservative member for Fort William, as their leader, the Conservatives opened a speaking campaign in the Northern end of the Okanagan Valley early this week.

DELAY IS MET IN MOORING OF U.S. DIRIGIBLE

Fog and Rising Temperature Interfered at Camp Lewis, Near Tacoma

Four o'clock in Afternoon Set For Mooring of Navy Air-ship Shenandoah

Tacoma, Oct. 18.—Balked first by fog and then by a rising temperature, the U. S. navy dirigible, Shenandoah, was unable to land at her mooring mast at Camp Lewis this morning and the landing, under the latest plans, will not be accomplished until 4 o'clock this afternoon.

In the meantime the craft is expected to cruise over various cities on Puget Sound, including Tacoma and Seattle.

The Shenandoah flew over her mast at almost exactly 8 o'clock this morning after spending considerable time trying to locate it in the fog. She then descended and tried to reach the mast, but the fog was so heavy that the attempt was a failure. At times the mast and the ship could not be seen by the thousands of people on the field.

SAVED HELIUM

After circling around for an hour and increasing her elevation from 200 to 1,200 feet, the Shenandoah sent a message to the mast that if the landing was made at that time it would be necessary to valve the valuable helium with which she was filled. Rather than let the gas escape the decision was reached to moor her late this afternoon.

The weather is now clear and the forecast for this afternoon is clear and calm weather.

More than 10,000 people were on the field, and they got fine views of the dirigible as she came down. She was disappointed in failing to see her tied up.

BRITAIN REQUESTS OPIUM DISCUSSION DATE BE DELAYED

Geneva, Oct. 18.—Great Britain has requested the postponement of the first of the two international opium conferences, arranged to be held in Geneva next month. The request was made because of the general election in Britain.

HUDDERSFIELD AND MANCHESTER DRAW

Minister Declares France Must Grow More Wheat

Paris, Oct. 18.—Declaring that France's bread supply must be independent of foreign crop conditions, Minister of Agriculture Queuille is framing legislation with a view to encouraging wheat growing in France.

As the first step, he will introduce as soon as Parliament re-assembles a bill reducing the price of German fertilizers delivered on the reparations account. He will also propose the abolition of customs duties on fertilizers and will attempt to obtain a reduction in railway freight rates on fertilizers, seeds and other agricultural necessities. Finally, his plan would bring about reduced taxation for farmers agreeing to plant an adequate area in wheat.

WEST HOLDS KEY TO GROWTH OF GREAT SELF-GOVERNING NATION, PREMIER TELLS VAST AUDIENCE

Eyes of World Are Fastened On Canada's Pacific Coast and Development of the Past Will Be Nothing as Compared to Expansion Ahead, Mackenzie King Declares in Brilliant Outline of Dominion's Future

NONAGENARIAN FLEW ACROSS U.S.; EZRA MEEKER

From Seattle to Dayton, Ohio, where airplane races were held, and from there to Washington, D.C., Ezra Meeker, Seattle pioneer, flew with Lieut. O. G. Kiley in an aeroplane. He came to the Pacific Coast in 1852 by ox team. He is ninety-four years of age.

LIBERALISM STANDS SOLIDLY FOR FREEDOM WITHIN EMPIRE

Premier Warns in Ringing Tones Against Separation From Britain or Annexation By United States; Self-government in British League of Nations is Only True Course; 5,000 at Meeting

Highlights From Premier's Address

"We now have the first Cabinet since Confederation in which every Province is represented."

"No Government in the history of Canada has had to face the financial difficulties with which this Government has had to grapple."

"I am not sure that one of the causes hindering the development of Canada is the fact that so much of the country's wealth is locked up in securities, with a high rate of interest and exempt from taxation."

"The Government will see that the last point at which economy will be applied is to the money used to help the dependents of those who lost health, limb or their lives in the Great War."

"We believe we can make the National Railways pay."

"The first duty of the Government is to economize, and we have done that in every direction possible. We have effectively fought our own following in this regard."

"The solution of our problems, I think, will lie in the development of western Canada."

"The eye of the world is focused on this part of Canada."

"The future of Canada and of the Empire will be improved by laying emphasis on self-government for Canada within the Empire."

"The idea of Imperial Federation is but a dream. It is not a practical thing."

"We have now the fundamental structure of an Empire that will be enduring and worthy of the name."

"The tie that binds the Empire is not a treaty; it is in part in our mind, in part in our heart—the spiritual league of nations that compose our British Commonwealth."

PRIME MINISTER GIVES DONATION TO MEMORIAL

A donation from the Prime Minister of Canada, the Rt. Hon. William Lyon Mackenzie King, and coppers from the school children of Victoria helped to swell the Memorial fund to erect a monument to Victoria's war dead yesterday. Premier King, Hon. H. B. McGovern, Minister without portfolio, and Hon. P. J. A. Cardin, Minister of Fisheries, and Senator Haydon called at the campaign offices, made their donations and inscribed their names on the register which will be placed in the base of the monument. The boxes which have been distributed to the schools of the city were also returned and contained donations from coppers to a ten dollar bill. The coppers contributed by children will stand as sincere tributes to the men who fell from those to whom the war is something of which they have but a vague knowledge, but who nevertheless contribute their mite to the heroes who gave their lives for Canada.

Among the donors of the past few days has been the Navy League Chapter I.O.D.E., which sent a cheque for \$25, while the Army and Navy Veterans, the Sergeant's Mess of the Garrison, Work Point Barracks, and other organizations have sent subscriptions.

HON. J. P. BRYNE, NEW BRUNSWICK, APPOINTED JUDGE

Ottawa, Oct. 18.—The appointment of Hon. J. P. Bryne, Attorney-General of New Brunswick, as a judge of the King's Bench division of the Supreme Court of that province is announced in The Canada Gazette this week.

LEAGUE COUNCIL OCT. 27 TO DEBATE IRAK BOUNDARY

Geneva, Oct. 18.—President Hymans of the League of Nations Council today recommended that a special session of the Council be held at Brussels October 27 to examine the differences between Great Britain and Turkey concerning the Iraq frontier. Sir Eric Drummond, Secretary-General of the League, communicated the recommendation to the other members having seats in the Council.

ADMIRAL SCOTT DIED TO-DAY IN CITY OF LONDON

Was in Seventy-second Year; Served Long Period in Navy

Invented Night Signalling Apparatus Now Used by British Warcraft

London, Oct. 18.—Admiral Sir Percy Scott, noted naval authority, died to-day. He was in his seventy-second year.

He was created a Baronet in 1913 after a lengthy service in the navy, which he entered in 1866, and was in charge of the gunnery defences of London against German aircraft attacks in 1915-16.

He was the inventor of night signalling apparatus now used in the British navy and of various appliances for improving the firing of heavy guns. He held numerous decorations for services in the Congo, Egypt, South Africa and China.

Sir Percy Scott was known as a leading naval critic, his unconventional attitude toward a number of designs leading him to use the press extensively in support of his views, in which he was often at variance with the Lords of the Admiralty.

CHURCH IS URGING WAR BE OUTLAWED

Resolution Passed by Disciples of Christ at Cleveland Convention

Cleveland, Ohio, Oct. 18.—A compromise resolution dealing with war was adopted yesterday by the international convention of the Disciples of Christ. Discussion of the subject had threatened to result in a serious division among the delegates, and a compromise was effected only after considerable debate.

The resolution as adopted differs considerably from the original text, which had included the clause "that the church should not sanction war." This clause was omitted by the committee on recommendations in submitting the report to the convention.

Another split was threatened when J. R. Crain, former adjutant of the "chambers" training school at Camp Taylor, Louisville, Ky., insisted that the resolution be sent back to the committee with the recommendation that a clause protecting conscientious objectors be inserted. The chair ruled that the convention could refer back to the committee, but could make no recommendations.

CONSCIENTIOUS OBJECTORS

Compromise was effected when Mr. Crain, after adoption of the resolution, was allowed to submit an amendment, which was sent to the committee for recommendation. The committee asked that "right of personal conscience in objecting to war be recognized."

APPEAL TO GOVERNMENT

The compromise resolution follows: "Whereas, the Christian conscience of the world is more and more coming to recognize that war is neither inevitable nor necessary; that it is unessential and inherently a violation of the teaching and spirit of Jesus; that it is the most colossal and ruinous social sin which afflicts mankind to-day; that it wages war against a great scale, with the ever-increasing destructiveness of weapons, would seriously threaten the existence of civilization; therefore be it resolved that the Disciples of Christ in international convention assembled, appeal to the Government of the United States to cooperate wholeheartedly with other nations in every effort to outlaw war as a crime among the nations."

SHANGHAI NEWS LEADS TO RIFT IN CHINATOWN

City Reporter For Chinese Newspaper Is Beaten Up

Chinese War Bulletin Causes Small Engagement in City Streets

Harry Hing Foo, a reporter of The New Republic, local Chinese newspaper, covering city news, was elevated to the dignity of a war correspondent last night after an exciting day in the streets of Chinatown.

Harry Hing Foo, according to his friends, set out to "cover" the city for news. He was not long before he arrived at a bulletin board in the native language giving the latest results of recent fighting in Shanghai. With a keen nose for a story Mr. Foo started to copy a portion of the bulletin.

While so engaged, say his friends, he was encountered by gathering crowds of Chinese who spoke unkindly to the news-gatherer. Words passed, it is said, and the incident closed at that stage when the reporter walked away.

WAS ATTACKED

A few hours later, after the friendly shades of night had gathered, Harry Hing Foo, it is alleged, was set upon in the street by five Chinese, who administered corporal punishment, to say nothing of blows to the face. With his left eye rapidly closing and displaying other bruises Hing Foo broke off the engagement and sounded a retreat.

It was some time later that the police were called in. Then followed descriptions of the attacking forces and a general search through Chinatown. Later, however, the police were charged with being one of the party that assaulted the news-gatherer.

Before Magistrate Jay in City Police Court to-day Chong Kee was charged with a common assault, occasioning actual bodily harm, and released on bail to appear for trial on Wednesday.

Chong Kee asked the court to take cognizance of punishment he received in the scuffle, as did the complainant Harry Hing Foo, Frank Higgins, K.C., appears for the defence, and W. C. Moresby for the complainant. A crowd of some five score Chinese watched the proceedings in silence and sullenly filed away.

Prince of Wales Played Golf on Ottawa Course

Ottawa, Oct. 18.—An exhilarating game of golf in the afternoon on the links of the Royal Ottawa Club with Lord Byng, Governor-General, as an opponent, and at night a dance at Government House, witnessed some of Ottawa's fairest young women as dancing partners, summed up the principal activities of the Prince of Wales on his first day of his stay in the capital.

The Prince seemed to enjoy the relief from the military crowds and overworked programme such as he encountered in the United States. For to-day the Prince has no engagements. He will probably play golf this afternoon if the weather permits.

FINE NEW BUNGALOWS ARE BEING ERECTED

D. H. Bale, Local Contractor, Building Modern California Bungalows

D. H. Bale, well-known contractor, has created a great deal of interest in the city by erecting three new bungalows of the style of structures erected in California. The builder has made a study of the latest California buildings.

The bungalows are equipped with the latest modern conveniences, including French windows; the built-in features include sideboards, bookcases, ironing boards, medicine cabinets, Dutch dressers, breakfast nooks and plastered panel ceilings.

In the bathroom there are recesses for built-in baths where no dust can accumulate, obviating the trouble of sweeping under and behind the den. They all have shower baths attached. There is no woodwork about the sinks, making them thoroughly sanitary.

The kitchens are fitted with built-in coolers that do away with the ordinary refrigerator. Electrical conveniences include all the latest appliances.

DIED AT EIGHTY-SIX

Port William, Ont., Oct. 18.—John Christie, one of the oldest residents of the Indian mission here, died yesterday, aged eighty-six. He had lived all his life on the mission lands.

Toronto, Oct. 18.—The cost of flour is declared to be the principal factor in another one-cent increase in the retail cost of a loaf of bread here from nine to ten cents. An almost immediate further increase of one cent a loaf is declared to be inevitable.

RAIL BOARD IS ASKED AGAIN TO HEAR RATE CASE

Winnipeg Board of Trade Would Have Western Arguments Repeated

Commission to Hold Sitting in Manitoba Capital on November 20

Winnipeg, Oct. 18.—A demand that the Railway Commission re-hear the Western case for maintenance of the Crow's Nest Pass Freight Rate Agreement during the sitting of the board on November 20 will be made by the Winnipeg Board of Trade, it was announced to-day by A. E. Parker, secretary.

Mr. Parker stated he did not know at present how the case would be presented, but said the whole matter would be brought to the attention of the commission "in the proper form," and that no opportunity would be lost in bringing forward the commission the Western viewpoint in regard to the upsetting of the Crow's Nest Agreement.

SIR HENRY THORNTON ENTERTAINS PRINCE

Will Hunt With Myofia Club at Hamilton on Tuesday

Montreal, Oct. 18.—Following his arrival here on Sunday evening, the Prince of Wales will be the guest of honor at a stag dinner given by Sir Henry Thornton, president of the Canadian National Railways, at the Mount Royal Club, and from there will attend a reception to be given by Madame L. H. Hebert for her daughter Melaine at the home of Mrs. C. B. Hosmer.

At noon Monday the Prince will meet the members of the Montreal Hunt Club at St. Augustine. The royal visitor will remain in Montreal until Tuesday when he will leave for Hamilton, Mass., where he will be the guest of B. Tuckerman and will hunt with the Myopia Club.

Ottawa, Oct. 18.—Rain which fell heavily interfered somewhat with the plans of the Prince of Wales to-day.

Inquiry at Government House this morning as to the programme of His Royal Highness was met with the statement that nothing had been settled. The Prince had intended to play golf, it was said, but if the rain continues he might play squash instead.

He will dine quietly at Government House this evening. Plans for tomorrow are equally indefinite, but the Prince will leave for Montreal at 3.30 in the afternoon.

At the brilliant dance given in honor of the Prince at Government House last night the Prince chose as his partner for the first dance Miss Sandford, secretary to the Governor-General.

Miss Eleana Murdoch, daughter of Hon. James Murdoch, Minister of Labor, had the honor of the next dance. Others who were chosen as partners by the Prince were Miss Helen Guthrie, daughter of Hon. Hugh Guthrie; Mrs. W. G. Pugsley, daughter-in-law of Hon. W. G. Pugsley; Miss Gladys Rogers, daughter of the late Mr. A. F. Rogers; and Mrs. Allan Keefer, daughter of Hon. Frank Oliver.

IRISH BOUNDARY GROUP IS NAMED

Joseph R. Fisher Appointed by British Government as Ulster Spokesman

London, Oct. 18.—The appointment of Joseph R. Fisher as the third member of the Irish Boundary Commission was announced to-day. He is a London barrister, a well-known writer on Irish affairs, and identified with the Ulster Unionist Party and was at one time editor of The Belfast News Letter.

Mr. Fisher is believed to hold conciliatory views and not to support the extremist "not-one-inch" party of the Ulster Premier, Sir James Craig, which party is against any change will take the slightest amount of territory from the northern area. It is believed the appointment makes a deadlock less likely.

APPOINTED BY BRITISH

The Anglo-Saxon Treaty provides for adjustment of the boundary between Northern Ireland and the Free State and the British Government, Ulster, objecting to any revision of the frontier which might cut into her territory, repeatedly refused to name a representative. Amending legislation passed by the British and Free State Parliaments authorized the appointment of the third member by the British Government, the appointee being considered a representative of the Northern Irish Government.

MOVIE PROFITS REPORTED

Toronto, Oct. 18.—The fifth annual report of Famous Players Canadian Corporation Limited, for the year ended August 30 last, shows profits prior to deductions for depreciation, interest, and deferred charges of \$722,758, compared with \$509,725 for the previous year. After provision for all charges and income tax and \$322,000 in dividends on the first preferred shares, a surplus of \$187,148 is carried forward, an increase of \$48,886 over the surplus brought into the year.

PREMIER KING IN VANCOUVER FOR FOUR-DAY VISIT

Vancouver, Oct. 18.—After he arrived this morning from Victoria Premier King's first official act following a greeting by a reception committee, was to place a wreath of flowers on the Cenotaph in Victory Square.

The Prime Minister and his colleagues will spend four busy days in this city and district. After attending a public luncheon under the auspices of Liberal organizations at noon, the Premier made a tour of inspection of the harbor. Later he will pay a visit to the North Shore.

SAN DIEGO WOMAN WAS MURDERED

Mrs. Anna Wilson Strangled in Her Room; Wrist Watch and Money Taken

Steven J. Richards, a Lather, Is Held by the Police For Investigation

San Diego, Cal., Oct. 18.—The body of Mrs. Anna Williams, pretty divorcee, was found on the floor of her bedroom here last night, almost nude. Dr. John Shea, county autopsy surgeon, made an examination and declared she had been strangled to death.

Her wrist watch and all of her money, amounting to almost \$100, were missing when her body was found by Steven J. Richards, forty-two, a lather, the police say. Richards was arrested and is held without bail at the city jail for investigation.

Mrs. Williams was thirty-five years old. She was a native of Canada and before her marriage to Dean Lovina Thompson. She was divorced in October, 1921.

BANDITS QUESTIONED IN POLICY INQUIRY

Many Witnesses Mentioned Will be Called in Montreal Investigation

Montreal, Oct. 18.—The six condemned bandits who held up the Bank of Hochelaga and murdered the police to retain the same tickets, were questioned yesterday by Mr. Justice Codrere, presiding officer at the inquiry into police conditions in Montreal, acting under the authority of Attorney-General Taschereau.

Only the judge, Sheriff Lemieux and a court stenographer were present, in accordance with orders received from Quebec. Among the Board of Inquiry to these persons.

It is claimed that the declarations of the condemned men have no force in law under the provincial statutes, as they are held to be degraded. This point will be argued at the next session of the police inquiry.

The interview at Borodex lasted for four hours, and it is presumed each bandit told a long story to his interrogator. It is supposed that a very large number of witnesses mentioned by the bandits will now be called to testify at the future sessions of the probe.

Stated College Education Worth Close to \$75,000

Boston, Oct. 18.—The cash value of a university education to its possessor is \$75,000, according to a report made public to-day by Dean Everett W. Lord of the Boston University College of Business Administration. The report is based on a long study of the earning capacity of college graduates.

The cash value of a high school education is placed by the report at \$33,000. The report gives the average maximum income of the untrained man as \$1,200, that of the high school graduate as \$2,200, and of the college graduate as \$5,000. The total earnings of each of the three types to the age of sixty are placed at \$45,000, \$75,000 and \$150,000 respectively. Dean Lord in his computation estimates also that while the untrained man reaches his maximum earning capacity at sixty.

TWO MEN RIDING MOTORCYCLE LOST LIVES IN SMASH

Toronto, Oct. 18.—Floyd Ramey, twenty-eight, and Ross Hare, twenty-two, both of Mount Joy, near this city, were instantly killed in the darkness early this morning when they rode on a motorcycle at high speed into a big motor truck stalled beside the highway near Scarboro Junction. The road at that point is straight.

The owner of the truck, C. F. Purcell of Claremont, says all his lights were burning at the time, including the red tail light.

The police are investigating all the circumstances of the accident. The young men were not married.

WHITE SURVEYOR MURDERED IN FIJI

Special to The Times. Suva, Fiji, Oct. 18.—On his way with £400 in his possession to pay Fijian workers engaged in making a road through the island of Viti Levu, C. B. Sealy, a white surveyor, was shot from ambush and killed instantly. The money disappeared.

The whole colony is searching for the murderers, as this is the first time in Fiji's history that a white man has been held up and murdered for money. The gun with which the crime was committed was found a little distance away. It had belonged to an Indian murdered a few months ago, the assailant of whom was never found.

Less Time—and sweeter, cleaner clothes

No one wants to spend an unnecessary minute at washing clothes, so wise women will use Sunlight Soap. It has a sure, gentle way of doing the wash that no ordinary soap can equal. The blend of

Nature's Finest Oils

in Sunlight cause it to lather richly in even hard water and give it wonderful cleaning power without hurting hands or clothes. It is a pleasure to use Sunlight—the purest laundry soap in Canada.

MINISTERS OPPOSED

All the Cabinet members except Mr. Harcourt will have to fight at Mr. Harcourt's side and few of the leaders of the other parties will escape contests.

There are many instances of fathers and sons appealing for election, mostly on the same tickets. Noteworthy among the parents whose parliamentary career is thus followed are Premier MacDonald and his fellow Laborites, J. R. Clynes and Arthur Henderson, and among the Liberals, former Premier Lloyd George and Sir Alfred Mond.

NO ARGUMENT THERE

A striking exception to family political agreement is that of the Baldwin, the Conservative leader's son, Oliver, being an ardent champion of Labor.

DANCING SEASON HAS COMMENCED

Ladysmith Begins Popular
Entertainment Early in
Season

Special to The Times
Ladysmith, Oct. 17.—The Girls Guild of St. John's Church held a very enjoyable whist drive last night, the object of the drive being to endeavor to raise funds to build a Parish hall. The prize winners were: Ladies, Mrs. Stickney, Miss D. Jones; gentlemen, Messrs. W. Davenport and D. O'Connell. Refreshments were served and during the evening Miss Hudson and Rev. Moss, pastor, rendered vocal selections; Mr. W. H. Hudson, accompanist.

The dancing season has commenced in Ladysmith and during the next few weeks a large number of dances will take place. To-morrow evening a dance will be held in Extension, Bessie orchestra supplying the music. On October 24 the carnival committee are running one of their feature dances in the Agricultural Hall at Ladysmith. Bill Wensley is back in town and is introducing some new features into this dance which will make it a success. Little's Harmony orchestra supplying the music. On November 10 the joint committee of the Agricultural Society and the Football Club are putting on a grand Thanksgiving and Armistice dance which has the appearance of being the dance of the season. In this dance the committee are taking pains to give the dancing public the best service possible, with efficient floor managers, dances that will suit both the young and old and with the best of refreshments. Herlinvieux Diamond orchestra are supplying the music.

On Sunday at Nanaimo Ladysmith Football Club will meet Nanaimo City in an Upper Island League fixture which will be one of the hardest encounters of the season. A game between these two teams has always been a drawing card and the public usually get their money's worth and this game will be no exception. Ladysmith are taking no chances on the result and are fielding their strongest team, which will be picked from the following players: Boyd, Campbell, G. Anderson, A. Anderson, Houston, Douglas, Appleby, Heaps, Davies, Baffar, A. Strong, P. Strong and Chapman. This game will be played on the Central Sports grounds, Nanaimo.

SUCCESSFUL DANCE

Special to The Times
Ladysmith, Oct. 17.—A most successful dance was held in the Ladysmith Hall last night under the auspices of the Ladysmith and Happy Valley Women's Institute. Pitt's orchestra provided excellent music and a large crowd attended. The event was so enjoyed that those present insisted upon the announcement being made there, and then of another such dance in the near future. The committee got together and arranged to hold another dance with the same orchestra on Thursday, November 13, the announcement when made was greeted with applause, which left no doubt as to the support it will receive. The sum of \$48 was made, which will be placed in the Institute funds for community improvement. The Community Hall being in need of some improvements, attention will be given to that by the Institute. The committee in charge of arrangements were very gratified at the success of the event.

A concert programme of particularly high standard will be given at Metchoin Hall on Monday, October 20, at the annual harvest home entertainment. The following artists will contribute to the programme arranged by Mrs. A. J. Gibson of Victoria: Mrs. A. J. Gibson, Mrs. Jessie Longfield, Miss Marjorie Broyle, Miss Justine Gilbert, Miss Gladys Watson and Messrs. Arthur Gore, Frank and Arthur Partridge. With such talented artists and a programme of varied selections a very large attendance is anticipated.

MORE ROOM NEEDED

Nanaimo, Oct. 17.—The Grand Jury at the Fall Assize found the following presentation:
"We, your Grand Jury, are aware the former presentations of Grand Jurors have not been very effective in bringing about the desired results, but we feel that we would be neglecting our duty, if we did not draw your attention to the fact that our court house requires great alteration in order to cope with the business which an increased population requires. As legislation has been passed placing the burden on the jury, it is very necessary that proper accommodation for lady jurors be provided. We believe that a province with the vast resources that we possess in British Columbia should provide proper

MISCELLANEOUS SHOWER

Special to The Times
Nanaimo, Oct. 17.—A miscellaneous shower was given in honor of Mrs. K. J. Lutz (nee Miss Cicely Freeman) at the home of her mother, Mrs. E. A. Freeman, Wallace Street. Little Dorothy McKenzie, dressed as a fairy, drew a beautifully decorated wagon into the drawing room heavily laden with gifts. A buffet supper was served, and a pleasant evening was spent.

Tommy Moore, the local pugilist, is in top form for his twelve round bout with Bayley Saturday for the lightweight title. The local aspirant is training faithfully and is expected to win his work out predict a stormy time for the present title holder.

The local golf club house was scene of a merry gathering last evening when members of the club were the guests of President and Mrs. Coburn. Two splendid suppers were rendered during the evening, the singers being Mrs. Drysdale and Mrs. Oleson. A three-piece orchestra was in attendance and furnished some of the dancing, which was enjoyed by all.

FIRE AT SOOKE HARBOR

Sooke Harbor.—A harvest festival service was held in the Holy Trinity Church on Wednesday evening, October 15 at 7.30 o'clock. The church was beautifully decorated for the occasion and the members of the Ladies' Guild, a solo was rendered during the service by Dr. R. Felton, which was much appreciated by the congregation. The Ven. Archdeacon Laycock officiated.

On Friday morning the home of M. Mickelsen caught fire and was burned to the ground. The fire, it is believed, originated in the attic, where the pipes which have been up for some time, must have broken through. Happily, no one was hurt and the children had all left for school before the fire broke out. Very little was saved besides a few blankets and chairs.

WEST HOLDS KEY TO GROWTH OF GREAT SELF-GOVERNING NATION

(Continued from page 1)

ways for the British connection and affiliation with the other Dominions. "We have laid the foundational structure of an Empire that will be enduring and worthy of the name of the country," Mr. King warned Canadians that the fixed charges of Government would be heavy for many years to come as a result of enormous indebtedness incurred during the war. Strict economy in every direction, however, had enabled the Government to balance its budget and make a reduction in current taxation of 10 per cent.

The Government's financial and tariff policies, he added, would do much to assist in the development of the West by reducing the cost of the importation of production. The Government's programme, he explained, was based on the conviction that greater production meant prosperity for the Dominion.

Mr. King's speech, which lasted just under two hours, was heard with careful attention, punctuated with enthusiastic bursts of applause as the Government leader laid down the policies of his administration in clear-cut and vigorous fashion. His masterly address was heard on the radio by thousands of Canadians all over the Dominion.

WARM WELCOME

"During the course of the long journey which it has been the privilege of myself and my colleagues to take from Ottawa to the West we have been the recipients of many expressions of good will, and have met with in the way of encouragement on the mission on which we set out, but it belongs to the most Western city to extend to us a welcome and reception that surpasses all others we have received," said Mr. King. In opening his address, "I cannot too sincerely thank you for according us the privilege of presenting to you some phases in which we all as Canadians are deeply interested, but before doing so may I take the opportunity of expressing our thanks to the Mayor for being the first to extend a welcome to us on behalf of the citizens on our arrival yesterday. I appreciate it the more because I am told His Worship is not of the same political faith as some of us on the West coast. I can assure him, however, that if he should discover the error of his ways and should like to change parties at any time to the party we have the honor and privilege to be, we shall be pleased to extend to him as hearty a welcome to the party as he extended to us to the city of Victoria yesterday."

THANKS GOVERNMENT

"I also wish to express my thanks to the Reeve of Esquimalt for extending a welcome to us on behalf of his community and thanks to Premier Oliver for the welcome he has given us and for the reception which he and his colleagues arranged at the Parliament Buildings which enabled us to meet old friends and to make new acquaintances, who I trust will become old friends as well. It is always a pleasure to meet Mr. Oliver and particularly it is a pleasure to meet him in his own Province and to discuss matters not only concerning the Province, but the whole Dominion under such advantageous conditions, to meet the members of his Government, his followers and his associates. I wish to thank him for the great help he and his colleagues have given me in the discharge of my duties at Ottawa. Consistently he has given us the benefit of his counsel, advice and opinions on matters concerning British Columbia. We have not always been able to meet his wishes because there are many difficult questions needing solution on which we must show patience. It requires patience both in the East and the West of Canada before we reach an ultimate solution of many of the problems with which we are faced."

"I also wish to express thanks to

the Lieutenant-Governor. I deeply appreciate the great courtesy extended to myself and colleagues for the hospitality of Government House. It was a privilege for us to come in contact not only with those of our own party, but with those strongly politically opposed to us.

THANKS AUDIENCE

"I in no particular mistake your generous welcome. It is not to me as leader of the party, but it is to me who in difficult times has been called upon to assume the great responsibility, having full knowledge of his limitations to do the best he can for Canada under the existing circumstances. I thank you for your expressions of good will and co-operation in the affairs of the Government."

"The purpose of this trip is not only for the purpose of laying before you the Government viewpoint on the question of the day, but to come to gain information first hand by observation and immediate contact on many questions of vital importance concerning all parts of Canada. Outside of Ottawa the minister confined in the city during the term of parliament, and other affairs also engaged so much of his attention that a Minister of the crown has little opportunity to get in personal touch with the people of this vast country. When to domestic affairs is added imperial relations and conferences calling him to the other side of the water his difficulties are increased many fold. This year the minister had tried to make the most of the time available by visiting as many parts of Canada as possible."

"In expressing words of thanks I would like to mention the press who have extended such a welcome to us. I appreciate it because it comes from the press at a time when we were expressed in so kind a way. I also wish to express thanks to our political friends for the entertainment they have provided for us."

IN CALM REFLECTION

"Having stated that our purpose is to know Western Canada better, I would add we hope during this trip to interpret to Western Canada as we have done to the East some of the problems the Government has confronted in striving to deal with the questions of the day."

"Without fault finding or criticism we want to place before our fellow countrymen in a spirit of calm reflection, the outstanding features of legislation. By speaking in different parts of Canada we hope to strike a note of unity which all of us as Canadians have so much at heart, and which we have recognized in all parts of the Dominion from the Atlantic to the Pacific. The note of unity which the people of Canada express in the singing of 'O Canada' and all it stands for. I hope our trip may serve the purpose in developing that national unity. We hope it will bring home some of the obligations which we as a part of the British Empire must take account of."

CABINET PROBLEMS

"I will deal with the difficulties of the Government of this country as it developed itself in the last general election. When the Governor-General in 1921 asked me to form a Government I had to look over those returned to the House of Commons to see which following I would have from all parts of the Dominion. I confess as I studied those returns carefully it appeared that the task of forming a Government of the Dominion was not an easy one, having in view the unity of Canada and the feelings of all parts of the Dominion. The number returned as Liberals after a Speaker was taken corresponded almost exactly to those sitting on the left—the Progressives and the Conservatives. I assure you the problem of forming a Government for the Dominion in a few years presented a serious problem for any one called upon to assume the responsibility. Had I felt that I could bear ill will to those who had opposed the Government I might have formed a ministry taken from those returned to the House and representation in the cabinet framed more or less after that fashion. But I am sure no one in any way worthy of attempting the task of that kind would consider anything of the sort. The problem was to bring about representation of the whole of Canada in the Government. Although the people of Western Canada had not sent the followers I wanted them as well represented at the council table where policies are shaped as any other part of Canada."

"The course I adopted was to make it known to members of the Progressive Party that if they wish to have certain of their number to come into the Ministry I would take into the cabinet such gentlemen as they wished to name provided, they were gentlemen of whom I personally could approve. They did not see their way clear to meet that overture. That did not make the task any easier. However, being determined to form a Government representative of the unity of the Dominion I set about the task. I said it was important to obtain men from the West who had been associated with the affairs of the province in an executive capacity, and men who would take a bold stand and who could handle portfolios of importance according to the provinces they represented."

WESTERN MEMBERS

"In Saskatchewan we had Mr. Motherwell many years Minister of Agriculture for that province, known throughout Canada and not surpassed in his duties by anyone in Canada. Knowing the importance of agriculture to the Middle West I offered him the portfolio, and he has proved a most efficient and capable minister in effect of his name."

"Coming further West to Alberta there was no liberal from that pro-

vince. I have intimated that I had made an offer to the Progressives, Hon. Charles Stewart, who had been Premier of the province, was suggested, but no one was prepared to give him a seat. I did not let the matter drop there. I might well have dropped it. But I knew among the French Canadians there was some of that chivalry which has been exemplified by Mr. Cardin. I told Quebec I wanted a minister from the province of Alberta, and it was impossible to find a seat for him in his own province. Quebec returned Mr. Stewart to the House to sit as minister representing Alberta. Our Conservative friends in the province of Quebec extended us the courtesy of not opposing Mr. Stewart. I am not sure that if he had been opposed that he would not have been returned by a safe majority, but I must emphasize that does not lessen at all the act of chivalry on the part of the Conservatives."

TRIBUTE TO DR. KING

"For British Columbia there were three representatives returned, but there was not one who had personally been in any administration. I wanted British Columbia to be represented by a man who had had experience in this direction. I wanted the people of British Columbia to have confidence in the Minister who represented them."

"I ask you if it would be possible to find a man better to represent the Province of British Columbia than Dr. King. No member of the administration has been more loyal, helpful and true to his colleagues than Dr. King. No man has been more zealous in the advocacy of any subject for the welfare of his Province, and he always has the welfare of the Dominion at heart. I cannot say too much for Dr. King. I congratulate British Columbia on having a man so qualified for the portfolio of Minister of Public Works, and I assure you the services he has given for the welfare of his country are deeply appreciated."

"Not only did I succeed in securing three gentlemen of wide experience of Western affairs, but I also gave them portfolios of importance to Western Canada. To Mr. Motherwell I gave the portfolio of Minister of Agriculture. To Mr. Stewart I gave the portfolio of Minister of the Interior. To British Columbia, with its vast resources and other great developments went the portfolio of Minister of Public Works, and Dr. King has filled that office to the entire satisfaction of the members of the House of Commons. Though each he has had to refuse many requests made to him, he has done so in such a modest and charming way that he has not lost the many friends he has, not only in this Province, but throughout the Dominion."

"I hope my friends of the West when they hear criticism of the administration will not forget that I am speaking of things of the moment. Things that have been done, not promises for the future. These are things which will stand for all times in regard to the Government."

MANITOBA REPRESENTATION

"Manitoba not being represented, we opened a seat in Winnipeg, and Mr. McMurray was elected after a pretty stiff fight."

"With that selection completed we were able to form the first Cabinet since confederation in which I believe has made for unity in Canada, a policy which we have sought to make prevail in everything attempted by the council board."

"There are, however, difficulties for any Government which has not a large following. When criticizing the present Government it must be remembered that it is a hard task for any Government which has not a considerable majority behind it to accomplish great things easily. In speaking of the works of the present Government it is unfair to compare it with Governments which have a great majority. We have to face the

House of Commons not knowing how our measures are going to be received by those sitting opposite. There is hardly a measure, however, which we have brought in which has not received substantial support from one group and sometimes from both groups of people. We are trying to meet the situation as the people of Canada would have us meet the situation, and I think that is

the reason why in the third year we received a 123 majority on the address and a 112 majority on the Budget. These majorities prove that our efforts are gaining the confidence and that we are winning the confidence of the people of Canada.

"When I announced early in August that there would be no general election, the press of the country virtually without exception, expressed their opinion that

DOMINION EXPRESS AGENCIES

NEWS IN BRIEF

Two more parcels of land were sold at the city tax sale to-day, at an upset price of \$333.

A building permit has been issued for a frame greenhouse for J. Goddard at 1751 Fourth Street.

Three motorists were fined in Oak Bay police court yesterday afternoon for tail light and traffic signal offences. The Motor Act. Fines of from \$5 to \$10 were imposed by Magistrate Jay.

The Saanich Council last night passed a vote of condolence with Councillor H. C. Oldfield and his family, in the sudden death of his father, the late John Henry Oldfield, Councillor Oldfield was absent from the session.

The executive committee of the Craigflower Parent-Teacher Association held its first meeting for the coming session at the home of Mr. W. Washington, George Road, on Thursday. It was decided to hold a concert and social on Halloween night at the school.

The Chinese immigration cases concluded in police court yesterday afternoon, four more accused being sentenced to six months, and deportation at the end of that period. Counsel gave notice of intention to apply in Supreme Court on Monday for habeas corpus proceedings in connection with the charges.

Much interest has been created in the city by the lecture given by the Rev. C. S. Quinlan, Dean of Columbia, on his recent visit to England, and on Monday evening next he will speak again in the schoolroom of the Metropolitan Methodist Church under the joint auspices of the Young People's Forum and the Ladies' Aid No. 1 Circle.

Furnishing of the east wing of the Jubilee Hospital has commenced, blinds, linen and similar articles being delivered, and mattresses are on order. The beds are being put in place. It is considered certain that the new building cannot be occupied until the New Year. The appeal for the balance of the furnishing fund has been postponed until the collection for the War Memorial effort has concluded.

Joint police force administration, suggested by Victoria, was last night discussed by the Saanich Council, the keynote being fear of greater cost, which was estimated to be quadrupled. A willingness to hear the views of the city advocates of union was expressed, and Councillors Graham, Vaneight, Robertson and Reeve Macneil were appointed a committee to discuss the scheme with Victoria city fathers.

Native Sons' Dance—An informal dance will be given by the Native Sons and Daughters of B.C. in Alexandra Hall, Tuesday, October 28. Orchestral orchestra has been secured. This is a preliminary dance of the season. It is the intention to hold a dance in conjunction with the Historical Society at the Empress Hotel at a later date, when a number of the old-time dances will be included in the programme.

The Ellington "window smashing case" was debated somewhat last night by the Saanich Council. Recent grocery accounts proving extension of the bill by Saanich merchants, the reasonably prompt payment of the bill and a study of the items, proved to the satisfaction of the council that much misunderstanding had occurred. Reeve and councillors agreed that Saanich had been given an unwarranted "black eye" by the episode, the committee being marked by vigorous protest and forecasts of unhappy consequences.

The Mount Newton Social Club held its annual meeting on Wednesday evening when military five hundred was indulged in, nine tables being occupied. The first prize was won by a score of twenty-seven by Mrs. S. Fox, Miss Gladys Guy, Messrs. J. W. Crawford and A. Hydes and Mrs. Freeland. H. Horn and Bert Fox and H. L. Salmon and in the deciding game first prize went to the former and second to the latter. The ladies furnished choice refreshment after the games were concluded. Members and guests are reminded that in order not to clash with another local function the next meeting will be held on Tuesday, October 23 instead of Wednesday, October 23.

A woman giving the name of Mrs. Frederick Carter, 4531 Thirty-third Avenue South, Seattle, is in touch with the police here with a request that aid be given her in tracing her family. The writer states that she was born in Victoria on January 25, 1900, and taken by foster parents to Roy, Washington, where her foster parents were engaged in hop-picking. At the age of seven she returned to this city but was taken again by her foster father to the United States. All she can tell about her real family name and life is that her Christian names are Elsie, Albert, and that of her foster parents Kettler. The woman is anxious to trace her family history to see if any members of the family be still living.

WISE COUNSELLOR WINS FIRST RACE AT BELMONT PARK

Laurel Race-track, Md., Oct. 18.—P. A. Burton's Wise Counsellor, winner of the first of the international special at Belmont Park, N.Y., last September, led from flag fall to finish in the \$10,000 Laurel Handicap here to-day. The three-year-old son of Mentor-Rustle stepped the mile in 1:33.2, which was a full second back of the track record.

The Glen Biddle Farm's Big Blaze took the place from Gifford Cochran's Sun Flag. Epinaud, the French horse, after being well up with the pace, quit at the head of the stretch and finished a badly-beaten fifth.

EGGS LED TO FINE IN COURT

Prosecution Under Dominion Egg Marking Regulation Act by Magistrate Jay

Prosecution under the Dominion Egg Marking Regulation Act was instituted in City Police Court this morning against John H. Scott and William Peden of the firm of Scott and Peden. The accused pleaded guilty to seven technical breaches of the law and paid a fine of \$50, in total. W. W. Davy and Gordon Campbell appeared for the prosecution and W. P. Marchant for the defence.

The prosecution charged that the defendant firm had been guilty of seven counts in that they, it was asserted, kept unclassified eggs exposed for sale; exposed same for sale in an unclean state; delivered uncleaned and ungraded eggs to the Royal Canadian Naval Barracks; that buying eggs for resale did ship without marking; that the eggs in the Royal Canadian Naval Barracks were unsanitary cases; and did supply eggs to the R.C.N. Barracks that were unfit for human food.

The defendants pleaded guilty to a technical breach of all seven counts, arguing, however, that the seven arose out of one transaction. For the prosecution William Hager, inspector under the Act, stated that he had visited the premises of defendant firm to give instruction in the operation of the standards set by the act.

Witness said he went to the Royal Canadian Naval Barracks and there found fifty odd dozen eggs supplied by defendant firm. In this lot he picked out about two dozen eggs with blood spots, which he said, were unfit for human use. The cases were in a dirty condition with newspaper and straw packing.

Summing up for the defence, Mr. Marchant held that the breaches were merely technical ones, against the terms of an Act that had only just found itself, and in which the public had not yet begun to operate with the dealer, dealer, consumer to keep within the bounds of the Act. Farmers were impatient for their money and would not wait until their produce had been graded, candied and "what notted."

The defendant firm had tried its best to live up to the letter and spirit of the Act, but with the cooperation of the farmers this was impossible. He would submit with particular reference to the charge of supplying eggs unfit for human food that these eggs had been secured but were eggs with blood-spots, such as in former days everyone had eaten without notice or complaint. There had been no complaint in this case from the Navy Yard.

In closing, said Mr. Marchant, there was at most a technical breach, freely admitted, and a light fine would satisfy the law.

Several Meetings Set For Next Week

With the approach of the municipal election, civic business is more active than at any time in the past. A number of meetings have been summoned for Monday. Some of them are as follows:

10.30 Monday, meeting of industrial committee of the City Council, and of the Chamber of Commerce, to discuss with the representatives of the Western Canada Co-operative Company the duties of co-operation in order to secure the rebuilding of the plant on the reserve here.

4 p.m. Monday, Police Commission, to discuss the proposed changes in the Victoria-Saanich Beaches and Parks committee.

Friday morning, resumed meeting of Civic Court of Revision on assessment roll.

At the meeting of the Beaches and Parks committee a petition from frontagers in the Elk Lake district will be considered, asking for a water supply to be extended to the area for domestic and irrigation purposes.

McNiven Spoke on Oriental Question To Native Sons

If Ontario had 240,000 Chinese dwelling within its borders that province would realize in a very forcible manner what the Oriental menace means to British Columbia. This Province, with a population of slightly over 500,000, has 40,000 Orientals replacing that number of whites in its industries, and if Ontario had the same number in proportion to its population there would reach startling figures. This was the information gleaned from a splendid address by J. D. McNiven, Deputy Minister of Labor, to the Native Sons of Canada on Thursday evening. The very large number of members of that society present evidenced its keen interest.

NEW YORK LIFE INSURANCE MEN CONCLUDE SESSIONS

That the life insurance agents should emphasize to the business men the advantage of security for investments, made through the skilled advice of experts on behalf of the insurance companies, was pointed out by L. Stetson Lindsay, superintendent of agencies, to the western department convention of the New York Life Insurance Company, in session here this morning.

Mr. Lindsay argued that many

business men, as soon as they had any money for investment, put it in concerns of which they knew nothing, and immediately began worrying about its future, instead of increasing the amount of life insurance carried, and leaving the choice of investments in competent hands. He thought recognition of that principle was necessary through commercial channels to a greater extent than ever.

A most successful convention, described by officers as one of the best ever held in Victoria here to-day, after head office in New York had made recognition of some of the exceptional efforts of representatives by souvenir cheques, was stated to these souvenirs ranged in value from \$400 to \$100.

DR. FEWSTER ON VIVISECTION

Despite numerous counter attractions, a large audience greeted Dr. Ernest Fewster of Vancouver, who addressed the local Anti-Vivisection Society last evening. Dr. Fewster's indictment against vivisection was delivered with a restraint that carried conviction to his hearers, as he emphasized the danger and the loss of human and animal experience. He denied that any knowledge of value in the treatment of disease had come from such a study of some of the highest authorities in saying that the finest study of anatomy and of treatment of wounds and injuries had come from observation of human subjects who had been the victims of accidents, from dissection, and from other methods not allied to vivisection of animals.

Speaking of the unreliability of statistics, Dr. Fewster instanced an experience of his own which occurred some years ago in Kansas. During a smallpox outbreak, of twenty-three smallpox patients in his own care, twenty-one had been vaccinated, nine within the year, but to save the face of vaccination everyone of the twenty-one was registered as "unvaccinated" despite his own objections, the speaker declared. Dr. Fewster supported the testimony of many prominent medical, scientific and laymen that the use of serum and vaccine had brought a corresponding harvest of such diseases as tuberculosis, syphilis and cancer. The toll of death and suffering had been terrible in Gallipoli, Mesopotamia and other parts where most unsanitary conditions prevailed and this despite frequent inoculations.

Dr. Fewster also emphasized the danger of state medical control, as being aimed at the liberty of the subject, and warned against placing unlimited power in the hands of any party.

FORMER PIONEER OF CITY DIES IN EAST

Late James Jackson Lost Daughter in Point Ellice Disaster

Many old-time members of the Odd Fellows Lodge of this city as well as pioneer residents will regret to learn that a late resident of Victoria, James Jackson, a former resident of Victoria, Mr. Jackson of recent years had been living in Tacoma, and his death occurred while he was on his way to his birthplace at Guelph, Ontario.

The Tacoma Ledger of Oct. 4 says: "Mr. Jackson was born February 26, 1846, at Point Ellice, B.C., and after farming and learning the carpenter's trade, he came to the territory of Oregon with a covered wagon caravan."

"He raised cattle on Rebel Flat, near Colfax, Whitman County, during the summer months and drove them to market in Portland, accompanied only by a faithful cayuse, the cattle feed on the range and he was nearly lost. Both gave their age as nineteen years."

Magistrate Jay, in ordering the stolen property returned to the owners, remanded the accused for sentence on Monday next.

PLAN MOUNT EVEREST CLIMB IN 1926

London, Oct. 18.—Presiding last night at a joint meeting of the Royal Geographical Society and the Alpine Club, the Earl of Ronaldshay, former Governor of Bengal, announced it was the intention to ask the Governor of Tibet for permission to try again to reach the summit of Mount Everest. Given permission, he said, the climb possibly would be started in 1926.

DR. KLING TO ADDRESS UNIVERSITY EXTENSION

The committee of the University Extension Association met on Wednesday evening to make arrangements for the coming season's series of lectures.

It is proposed that the first lecture this season shall be delivered by Dr. L. S. Kling, president of the University of B.C., on the subject of "Adult Education."

As Dr. Kling is in the East at present and will not return until November 1, no definite opening date could be arranged, but it is expected to be held the last week of November and the series of lectures on "Evolution" will then follow in the succeeding weeks. It is hoped to make definite announcement of dates very shortly.

As a favorable balance is in hand, no membership fee will be collected this year from existing members. Membership cards may be obtained from Miss Gray at the City Library, or from the secretary, J. T. Stott, 1249 Crescent Road.

FORMER CLOTHIER DIES IN CALIFORNIA

Isadore Lancaster Was in Business For Twenty-five Years

The death occurred in San Francisco yesterday of Isadore Lancaster, an old and respected resident of Victoria who had been residing in the California city for a month. Mr. Lancaster, who was a native of London, England, was well-known in Victoria.

He conducted a clothing store on Government Street for twenty-five years. Although not in public life he took a keen interest in matters affecting the welfare of the city and had a wide circle of friends who will be considerably grieved to hear of his death. He was a member of the Knights of Pythias and also a Mason, belonging to the Quadra-Vancouver Lodge. Before leaving Victoria for the South he resided at 14 Joseph Street. He leaves a widow and two children, Gerald and Esther; one brother and four sisters in London, England, and odd nephews in Victoria. A Lancaster of Lancaster's Clothing Store.

The remains will be sent to the B.C. Funeral Parlors. Funeral arrangements will be announced later.

TWO GIRLS ADMIT SHOPLIFTING ON EXTENSIVE SCALE

Unknown Benefactor Briefs Counsel to Defend Edmond-ton Accused

Pleading guilty to six charges of theft from local stores, Alice Buchell and Norma Blackett, two nineteen-year-old visitors from Edmondton, were remanded in the City Police Court to-day for sentence on Monday. An unknown philanthropist briefed Mr. Davis as counsel for the accused who otherwise would have remained undefended.

The accused pleaded guilty to the theft of two dresses from Scurrah's Limited, on October 15; one dress from the firm of Angus Campbell on the same day; two hats from the premises of Miss E. Livingstone on October 14; one dress from Madame Watts one day later; and one dress from Gordon's Limited on October 16.

In giving the circumstances of the arrest, Harry J. O'Leary, deputy chief of police, stated that the accused were traced after the theft from the Scurrah premises to a downtown rooming house, where the other goods were discovered at that time. In their arrest the accused voluntarily assisted the police in checking up what was stolen and accused, he said, had their lesson from which establishment. The from which establishment. The from which establishment. The from which establishment.

Speaking to the defence, Mr. Davis stated he had been briefed by a well-known Victoria, who preferred to be anonymous. The accused told a very frank story and had their lesson now. He would ask for leniency. Both were of Edmondton parents and had been employed in that city, one in a wholesale house and the other in a candy store. They had come to the Coast on a three months' vacation and landed in Vancouver without much money. There they had gone to a dance and had become attracted by the "lovely dresses" of several dancers. They were told by these that the dresses were obtained in the manner stated and had set out to emulate that had example. Both were now ready to return to their homes, if that leniency were granted. His client was willing to see that they did return to their homes.

For the prosecution, C. L. Harrison stated that this could not be permitted as the police of Vancouver and New Westminster also sought the two accused.

In answers to questions by the court one accused stated that she was fatherless. Both lived in Edmondton and had been employed as stated. Both gave their age as nineteen years.

Magistrate Jay, in ordering the stolen property returned to the owners, remanded the accused for sentence on Monday next.

The arrest was made by Detectives Phipps and Calwell, following the theft reported by Scurrah's Limited.

FRANCE MAY HAVE Big Loan From U.S.

Paris, Oct. 18.—The Ministry of Finance would apply the proceeds of a United States loan, if one should be arranged, to the deficit in the budget of 1924, with the determination to balance next year's budget for actual receipts from taxation. The Government's largest single obligation is the legal requirement to pay 2,000,000,000 francs to the Bank of France for the reduction of the bank's advances to the Government.

Conversations with the Finance Minister and J. P. Morgan, of the United States banking firm, will have during the next two or three days are designed to be of a preliminary nature. Nothing likely will be decided for a fortnight.

WEST HOLDS KEY TO GROWTH OF GREAT SELF-GOVERNING NATION

(Continued from page 1)

ception expressed their approval. What better proof could there be that the Government, everything considered, had done the best under the circumstances that existed. The press were agreed that there was no reason why the Government should be thrown into the turmoil and chaos of a general election.

"The difficulties, however, which the Government has had to face have not made the task too easy, and must be taken into account by those inclined to criticize. The greatest difficulty of all has been the financial difficulty. I can appeal in this regard to the experience of any man or woman at some time or other in his or her life to bring home what that means. There has been no Government at any time in the history of Canada which has had to face such problems of finances as the Government in office at the present time. During the war large sums of money were required. Canada has never before and never shall have to meet such enormous sums of money to meet her great expense at that time, but the time has come when she cannot afford to borrow. She must make good the money borrowed, and must begin to pay back the vast accumulation of loan and debt which has as a consequence of this extensive borrowing.

PUBLIC DEBT
"To-day the public debt is \$2,340,000,000. During the period of war \$1,670,000,000 was added to the capital cost account alone. Every cent remains to be paid. Not one dollar of the capital cost of the war has been met out of taxation of the country at the present time. I have been challenged on that remark, but I repeat it. It has been argued, but there have been war taxes imposed and I ask to what account have these taxes been paid. They have paid the interest. The interest is what we pay to fight off paying the capital. The money used in paying interest was only putting off the day when the debt must be met.

CONTINUING OBLIGATIONS
"The money spent for pensions, soldiers' civil establishments and land settlement are not capital cost of the war. They are continuing obligations following the war which have to be met. We today are paying large sums on pensions and soldiers' civil re-establishment, but no one would contend that that is a capital cost of the war which ended in 1918.

"There are the problems left for the Government to decide. These loans have for the most part been made tax exempt. The Government is deprived of revenue from holders of these privileged reserves representing a large part of the wealth of the country.

"I am not sure that the industry of Canada does not suffer because so much wealth of the country is locked up in these securities. In November some of these securities become due. The Minister of Finance has gone to the market and had borrowed money to meet the obligation. He has borrowed money not at 5/2 per cent, which we pay on our bonds, but at 4 per cent, and is affecting a saving in interest account of between \$3,000,000 and \$4,000,000 by this transaction. We can only carry this out on one or two issues, and the others are not due for years yet.

"The interest on the public debt alone comes to the colossal sum of \$135,000,000. That is more money than it took to run the Government of this country prior to the war. That is not the only obligation. There is a vast important obligation. That which we owe to the returned men and their dependents of those who fell in the great war. Since coming into this hall I have received a message of greeting and expression of view from the Tubercular Veterans' Association which is one of many organizations watching the interests of the returned men.

"To those suffering from tuberculosis, to the maimed and disabled of the Great War, to those who are impaired by their services and to the dependents of those who died serving their country there is an obligation on the part of the nation which is the first of all obligations of any Government. So far as this Government is concerned in effecting economies this will be the last place that the cut will come.

C.N.R. SYSTEM
"We found also when we came into power we were in possession of a bankrupt railway system involving the country in large liabilities. Some people said, 'Why don't you sell it?' in the first place there is no one who will buy it. In the second place we think we can make it pay. We have but the best man we can get in charge of it, but in the meantime we have been forced to meet heavy obligations on account of the railway.

"We have to raise \$300,000,000 of what is known as uncontrollable expenditure before we begin to finance the country. I am not blaming or criticizing. I am giving you cold clear facts. Taxation must amount to \$400,000,000 if we are not to add to our public debt. It is asked why does the Government not do certain public work. There is the answer. We must economize in as many directions as possible. There may have been cases where we have been extravagant. We have undoubtedly made mistakes but we have striven earnestly to keep down expenditures on everything until we get the public accounts balanced.

"We have succeeded in balancing our public accounts at great cost. Sometimes I wonder if it has not been at too great a cost, and we shall feel after effects, but each year must take care of itself. Right after the war, when Mr. Meighen went into office, the Government did not balance expenditures and revenue. No one would expect during the war that the budget would balance or that in the days of demobilization that it would balance. But in 1919, 1920 and 1921 we had reason to expect that the late Government would shape a course to make ends meet more or less. In 1920 and 1921 they added \$21,000,000. The next year they added \$21,000,000.

"The next year we so financed as to bring the addition to the public debt to only \$30,000,000. Last year was the year that we have shown a surplus, \$35,000,000, and we have given the people a reduction in taxation.

"That stands to our account and must be taken into consideration in the years to come. There is the large uncontrollable account, which has to be met and which is so large that it is impossible to compare what this Government has done to what other Governments have been able to do.

INCREASED EXPORTS
"Our future is reflected in the total production of the country. These exports must be met out of the production of Canada. When we went into power Canada was importing more than she was exporting. In 1921-22 our exports totalled \$747,000,000. In 1922-23 we exported \$945,000,000 and last year Canada's exports totalled \$1,580,000,000. Those figures show Canada is becoming increasingly prosperous from its business revenue. This prosperity is shared in a large measure by the city of Victoria.

"I can not but feel very strongly that the solution of our Dominion problems is going to lie largely in the development of Western Canada. This development during the last twenty or forty years has been the most significant feature in the development of the country.

"In the first census of 1871 Western Canada had only three per cent of the population of Canada. In the last census it had twenty-eight per cent. The Province of British Columbia at the time of the first census had less than one per cent of the total population of the Dominion. It now has six per cent, and will very soon be greatly in excess of these figures. The eye of the world is focused on this part of Canada.

"The exports from Canada across the Pacific are worth nothing. In 1921-22 the exports to China were \$1,190,000. In 1922-23 they were \$12,000,000. To Japan in 1921-22 they were \$28,992,000. To Australia in 1921-22 they were \$10,674,000. In 1922-23 they were \$19,924,000. To New Zealand in 1921-22 they were \$4,128,000. In 1922-23 they were \$7,360,000. The total for the four countries for the last two years was \$121,500,000. In 1922-1923 \$72,650,000. This represented an increase of 430 per cent in two years.

"The growth of Western Canada is a phenomenon in the future. The whole tendency is for an increase in Western development and population through the vast increase in the development of Western resources. "Victoria has shared in this increase. The exports from this port in 1921 were \$2,351,000. In 1924 they were \$3,965,000. There has been a larger increase in the last two years than in the preceding eleven years. In 1911 the export trade from Victoria was \$1,151,000.

"The trans-Pacific trade will be a determining factor for the West. In the last three or four centuries the Atlantic route has been the route for trade, but I believe that this century will see it move to the Pacific. The opening of the Panama Canal brought business that way. European needs are being met from Pacific ports and there will be great developments in trade with Asia. The standpoint of life in the Orient is being raised. She is calling for better foods and more supplies. The West will supply the food and material for the Orient. British Columbia lumber and other products will trade for years to come.

"Hauling tonnage at Victoria has increased. In 1910-11 it was 1,750,000 tons. In 1922 it was 2,485,000 and in 1924 2,985,000.

OPTIMISM JUSTIFIED
"There is every reason for justified optimism for the immediate future. From England there have been

increases of capital. Until the last year or two conditions were not favorable to the Pacific Coast. There was no demand for goods from Europe. Shipping rates were prohibitive. The shipping rates have been altered and there will be a demand for goods from Europe in the years to come. The inter-allied Conference has given Germany the means for re-establishment, and Germany will be demanding goods from this part of the world. These are the greatest reasons why this part of the Dominion should look for increased prosperity. Our sister Dominions in the far South Pacific will also demand goods from us which will add to that prosperity.

"The present Government has been able to reach an agreement with Australia of a reciprocal character, giving preference to goods entering the Australian market equivalent to that given the Government of Great Britain. We give a preference in our market for the goods they produce at seasons which come different from our own. The treaty secures a free entry of the important commodities of British Columbia, fish and paper. The development as a result should be considerable in the next few years. When this treaty is completed there was an absolute freedom of trade on these two products.

"I notice in the newspaper to-night that the Ford Company has a model chassis which benefits by the intermediate tariff. It gets a better rate from Canada than from the United States, and they are going to make them in Canada.

"We have made an agreement which is not perhaps as comprehensive as we would like it to be, but it is a step in the right direction. The skies of the world commerce made dark by the draining away of the war and by the reconstruction and payment years which have followed are fast clearing. Prospects are good and prosperity unequalled in the past is ahead.

IMMIGRATION
"With respect to the figures given on immigration, if there were more time I should like to go into this very fully. The Canadian Immigration Department did not keep until the last year figures on the return of Canadians from the United States. Theodus of which you have heard was made is the customary traveling back and forth between Canada and the United States at times when there are opportunities in the United States. By keeping a record we find that on an average 5,000 Canadians are returning to Canada every month. The figures which have been quoted previously are figures of the United States, which include as immigrants all those who have crossed over from Canada. The contract laws of that country require that a man shall not be admitted if he has previously secured employment in the country, and it is to be assumed that the Canadians who have gone over have therefore been classed as immigrants.

"It is wise to look the facts in the face and not be unduly pessimistic, as the figures when properly examined signify nothing in the nature of alarm.

DEVELOPMENT
In facing the question of how to meet the problems which Canada has to meet, that at the base of all fundamentally is the development of the nation. The only way progress can be made is by increasing the production of the country. Wealth is not money in the bank. Money is taken as a means to an end. It is the service which can be obtained for money. The real wealth of the country lies locked up in the soil, in the forests, in the mines and in the sea. It is to get at this wealth that a wise policy must be directed. For the development of these natural resources are two things necessary, capital and labor. Without them nothing can be done.

"You have heard of the tariff changes which we have made. While they will be of immense benefit to all parts of Canada there is no part to which they will be of greater benefit than the Province of British Columbia. This policy was primarily designed to benefit the natural resources of this country. There is no place so wealthy in its natural resources as this province. You are already first in production in the fishing industry. You are second in minerals and in manufacturing output you are third.

"To-day when competition has become world-wide, the machinery is the power that has taken the place of the old regime on hand tools. The old methods of production, where a man worked with his hands, supply the material at every stage. What is in the efforts into commodities available for human use. Every day we have needs resolves itself back to the mines, the forest, the sea and the soil.

"They are the four basic industries. Why tax the products of these four basic industries? Do you see how they help this province more than any other province? You men are the men who go out to the seas, to the mines and to the forests. Would it be a wise policy to tax these implements in the budget this year the duties were not completely wiped off, but were reduced so far as the implements for agriculture and fishing are concerned. That was the budget that gave us a majority of 113 in the House of Commons. The Conservatives fought us. They said they would destroy protection as though protection itself were something sacred.

"You must remember that protection is taxation. If it is taxation, it may often help an industry in Canada until it becomes self-sustaining, but it is taxation as any other form of tax.

"I think there are certain industries which want safe-guarding from outside competition up to a certain point. But we must not forget the consumer has to pay sooner or later. You are merely helping to bring it to the stage where it is self-sustaining.

"No Government by direct taxation is able to raise \$4,000,000 a year. We recognized that we must raise by indirect taxation some of this colossal sum; then we were faced with the question of whether we should follow along the old ruts or recognize the expanding production of the country. We are making production on a larger scale possible at less cost to help every industry in the country. By securing the raw material for the manufacturing at less cost the production costs less.

SIDNEY
A very enjoyable dance was given by Mr. and Mrs. C. Cochran at the home of Mrs. McKenzie, Miss R. Curtis and Miss M. Cochran. Those present were Mr. and Mrs. Bodkin, Mr. Wilson, Mr. McKenzie, Mr. and Mrs. Whidden, the Misses W. Pitt, E. White, M. Wakefield, J. McNaught, G. Simister, E. Whiting and R. Curtis of Victoria, Mr. T. Tucker, P. Wilson, Y. Goddard, S. Parker, McDaniel, J. Wakefield, and G. Anderson.

Mr. W. Begg of Tiverton, Ontario, who has been staying with his sister and brother-in-law, Mr. and Mrs. A. Munro, Marine Drive, has left for home.

Mrs. Nelson of Deep Bay has returned from Hamilton, where she went to attend the Dominion Conference of the W.A.

Mr. A. Stevenson of Vancouver is staying with Mr. and Mrs. Sleson.

Miss P. Gill of Long Branch, Laraway, Washington, is staying with her sister and brother-in-law, Mr. and Mrs. Bruce Burton, East Road.

Miss Beachley of Banff has been staying with Mr. and Mrs. L. Horth of Birch Road.

Major Sparks late of Strathcona's Horse, has bought Mr. Bristow's property at Deep Bay.

Mr. J. Copthorne and Miss M. Copthorne have gone for several weeks to Calgary.

Mr. and Mrs. H. McIntyre of Winnipeg have been spending a few days with Mr. and Mrs. Wakefield.

Mr. J. Crossley and Mr. G. Davis have returned from the prairies.

A meeting of the Parent-Teacher Association will be held in the school on Tuesday, October 21, at 8 o'clock.

Rev. W. Carroll, rector of Cedar Hill, will preach at St. Andrew's Church on Sunday at 11 o'clock in the morning.

LADYSMITH
Mr. H. W. Maynard, East Wellington Collieries, was in town yesterday on business.

Mr. and Mrs. H. A. Gilroy are receiving congratulations upon the birth of a daughter.

Mr. Allan McDonald and family have returned to town after residing in Victoria for some time.

Mr. W. Strang arrived yesterday from Scotland and will take up his residence in Ladysmith.

GANGES
Mrs. Nelson Rogers left for Vancouver, after spending several weeks with her sister, the late Mrs. Joseph Akerman.

Miss M. Lovering returned to Ganges after spending a few days in Vancouver with her brother.

Mr. Peter Gaylor was a visitor to Ganges on the first of the week regarding some logging business.

Mr. H. Casperson returned to Ganges after spending a week in Vancouver.

Mr. Heron returned to Vancouver on Tuesday.

Rev. T. E. Rowe, Warden of Guild of Health, has been spending several days on Salt Spring. He preached the sermon at the Harvest Festival services held at St. Paul's Church, Ganges, Sunday morning, and on Wednesday afternoon the Women's Auxiliary held a meeting in the I.O. D.E. room, and after a short business meeting Rev. Mr. Rowe addressed the members and friends.

Visitors at Harbor House were: Ed. W. V. S. Patton, Vancouver; Capt. Jack Rhodes, Engineer Erickson and A. Grun, Seattle; E. Thompson, Dr. Charles Harding and A. P. Dodge, Victoria; Hugh Greenwood, Sidney; Frank H. Ching Vancouver and Major and Mrs. E. A. Mitchell, Nanaimo.

ERUPTIONS IN HEAD AND FACE
Red, Swollen and Sore. Cuticura Heals.

"I had my trouble from childhood. It took the form of white, scaly, sore eruptions which caused terrible itching and burning, also loss of sleep. My head and face and parts of my body were affected. The skin on both my head and face was red and swollen and awfully sore. The breaking out caused disfigurement, and I lost nearly all my hair.

"I began using Cuticura Soap and Ointment and they afforded relief, and at the end of three months I was completely healed." (Signed) Mrs. W. A. Miller, Marshall, Washington, Nov. 8, 1923.

Use Cuticura Soap, Ointment and Talcum for all toilet purposes.

Four Days' Special Demonstration of Blanket Values

A Timely Opportunity to Select Your Winter Requirements From Large and Well Assorted Stocks

Contracts Mailed
To Cougars, Lester
Announces To-day

Victoria Mogul Refused to Give Names of Players He Had Sent Them To

W.C.H.L. Not Ready Yet to Broadcast News; Must Wait Approval of Schedule

Contracts have been mailed to all the men that Lester Patrick, manager of the Cougars, wants on his roll this winter.

Just who these men are Lester refused to say this morning.

"Yes, you can't tell the fans that I have sent out my contracts, and you can say further that I still think I am going to have the best team that ever wore the blue and gold," stated Lester.

Everyone would like to know just who Lester intends to have at his Cougar table this winter. In past years it has been fairly easy to guess the regular line-up, but this year things are different and big changes are looked for.

The waiver list has given the information that four of last year's players may not be in Victoria uniforms this year. Trihey, Anderson, Gibson and Fowler are in the market.

PLAYERS READ CAREFULLY

What everyone would like to know is who will take their place. This will all come out in good time. The players take time to read the contracts and see if the price is to their liking before they communicate with Lester and let him know what their intentions are.

There have been rumors that "Happy" Holmes, last year's goalie with the Seattle Metas; Gordon "Red" Eames, rarin' defence man of the Metas, and Jack Walker, the old fox, are to join the Victoria squad this year. If this trio does come and Lester gets Fredericksen, Loughlin, Halderson, Hart and Meeking back, together with Arby, the Cougars are going to have a pretty smart looking tribe of warriors.

The Western Canadian Hockey League is not ready to burst on the sport pages with announcements yet. It is marking time until the schedule is finally approved and from then on one can look for all kinds of developments. The schedule has been approved by Victoria, Vancouver, Regina, Saskatoon and Calgary. Benny McKenzie, manager of Edmonton, has yet to pass upon the plan, but as he is in the North, he is out for furs, it may be a few days before he gets back to Edmonton. It is not likely that McKenzie will find any flaws in the schedule and as soon as he has signed his name to it President Richardson will announce its release.

WILL TELL BIG STORY

The schedule no doubt will tell a big story in itself. Owing to the fact that there are only two teams on the coast it may be necessary to change the regular nights. In the past Victoria has had hockey on Friday nights, while Vancouver has reserved Monday for its hockey. Then, again, some of the teams will have to open the season away from home, and just which club will be forced to do this will not be known until the schedule is out.

Calgary, Oct. 18.—Gossip in sporting circles at Edmonton has it that Calgary is still edging to get Hal Winkler, Eskimo custodian, as goal tender for the Tigers. The local management is not prepared to confirm the report, it having been stated some time back that Calgary turned down the Winkler deal at the time when Spunk Sparrow was purchased outright by the Tigers. There has been much talk of the Tigers seeking a new net guardian next winter, and many bids have been made by the management with indifferent success.

The Edmonton hockey club has not made any deal for Winkler thus far, but it is understood that Frank Patrick was showing much interest in the Esk. goalies when it was rumored that Huchle Lehman was uncertain about returning to the Maroons. Since Lehman has agreed to don his harness again the Coast is no longer desiring as a goal tender. It was stated for Victoria's nets, and these are the only club in the Far West.

BERLENBACH GETS CHANCE

New York, Oct. 18.—Permission for a light heavyweight match for the championship of the world on November 14 between the titleholder, Mike McTigue and Paul Benvenuti, knockout sensation, was granted yesterday by the State Athletic Commission, which had previously refused that Gene Tunney be given the first opportunity to meet McTigue.

FRISCO CATCHER BEANED

San Francisco, Oct. 18.—Catcher Archie Yelle of the San Francisco baseball club was hit on the head and knocked unconscious by a pitched ball thrown by Pitcher Boehler of the Oakland club, in a game between the two here yesterday, and was rushed to the Franklin Hospital. It was announced that his skull may be fractured. The mishap occurred in the second inning.

LEWIS TOSSES SAMPSON

London, Tex., Oct. 18.—Ed "Stranger" Lewis, heavyweight wrestling champion of the world, retained his title here last night by defeating Earl Sampson, German invader, in straight falls, winning both of them with his famous headlock. The first fall lasted forty-four minutes, while the second after eight minutes of struggle.

\$100,000 IS PRICE
PLACED ON HIS HEAD

JOE BOLEY

Baltimore, Md., Oct. 18.—\$100,000 or not a cent. That's the price set upon the brow of John Bopolski, none other than Joe Boley himself, the greatest shortstop in the minors.

Jack Dunn, owner and manager of the Baltimore Orioles, six times champions of the International League, greatest record-breaking club in organized baseball, is the man who labeled Joe.

Joe does the shortstop for the Dodgers. He has been doing it for six years—those six years Dunn has been winning pennants by anywhere from six to sixteen lengths.

Wilbert Robinson of the Dodgers a year ago shot his price up to \$50,000 for the price he wanted—\$100,000—and the glad news for everybody but Baltimore fandom will be announced in due time.

The White Sox made a bid of \$50,000 two years ago. Dunn turned to the society page and continued his reading.

Now there comes the report that Mr. Dunn has at last sold his prize beauty for the price he wanted—\$100,000—and the glad news for everybody but Baltimore fandom will be announced in due time.

Boley either goes up now or never. His six years of toil would avail him nothing, because if a minor can't go up he feels he has been a failure.

And a man who has short-stopped on a six-time consecutive winner is bust.

Ten years ago Joe had never seen a baseball. He worked ten hours a day in a coal mine in Mahanoy City, Pa. For months he never saw daylight, working a day turn in the mine.

Joe and a mining donkey collided and he got a bump and a grouch at the same time. The combination caused him to quit his job and get a lung full of fresh air.

Joe and a mining donkey collided and he got a bump and a grouch at the same time. The combination caused him to quit his job and get a lung full of fresh air.

Dunn got him in 1918, toned him up a bit and shot him in at short.

Dunn was warned that Joe's eyes were bad, due to his long confinement in the coal mines. He was told that Joe would never do at such a vital spot on the field.

Dunn's answer was that he would give Joe a season of daylight and see how he worked.

It worked. Joe hit over 300 and batted .347 in 137 games. He improved in batting in 1920. And continued to shine afield. Dunn was winning his flag. Offers were made for Boley, but Dunn held on to him.

At the beginning of this year Boley's salary was \$2,000, more money than paid to any other shortstop in the league.

And what makes Boley's sale story sound plausible is the intimation from Oriole Park that Dunn is going to dismantle his great baseball machine this year. He has "told" Phil Oden, his best pitcher, to the Philadelphia Athletics for \$100,000.

McGILL TRACKMEN WIN

Kingston, Ont., Oct. 18.—With a total of six victories from the men's intercollegiate track meet here yesterday, Varsity being second with forty-six points and Queen's third with twenty-four.

Vancouver, Oct. 18.—Gordon Shields and Ed Brown won the men's doubles in the University tennis tournament, when they defeated L. Baker and Chub Arnott in three of four sets. The winners won the first two sets 6-4, 6-4 and the last set 7-5. The losers scored in the third set 6-4.

Miss Bullock-Webster took two straight sets from Jean Struik and won the women's singles.

Five Teams May
Play In Bowling
League Next Year

Efforts Will be Made to Organize First League in History of Victoria

Game Has Taken Tremendous Hold; Civil Service Organizes Fifth Club Here

There is every indication that next Spring steps will be taken to form a city lawn bowling league. It is hoped that by that time there will be five clubs ready to play.

After many years of faithful pioneer work by the Victoria Lawn Bowling Club the game has at last taken hold here and this year has witnessed a tremendous development.

For eight or nine years the Victoria Club had to send to Vancouver for competition, and teams were brought in on holidays for matches. This year, for the first time, it was unnecessary to do this as the Burnside and C.P.R. Bowling clubs were in a healthy condition and able to provide competition and the Civil Service came through with some splendid matches.

HAVE GOOD LEAGUE

By next year it is expected that there will be the material here for a good city league. Victoria, Burnside and the C.P.R. have their own greens and are ready to enter now, while Oak Bay and the Civil Service have organized and are prepared to compete under their colors even if they cannot get greens ready in time.

The men who have fathered the game in this city feel extremely gratified that their efforts have not been in vain. Despite a belief that the game is only for old men a great many young bowlers are joining the clubs. The game here is having a similar experience to golf. A few years ago golf was regarded as an old man's game, but to-day more young men play it than old.

At a meeting held in the club rooms of the Provincial Civil Service Association last evening it was decided to organize a lawn bowling club. Interest in the sport is keen and a strong board of directors was elected. A first-class playing green cannot be procured for a year or two, but in the meantime arrangements have been made for temporary quarters.

It is anticipated the new club will get sufficient practice next Spring to become a strong entry in the proposed city league.

The officers elected were as follows: Patrons—His Honor Lieutenant-Governor W. C. Nichol and Premier John Oliver; president, the Hon. Dr. Sutherland, Minister of Public Works; hon. vice-president, C. P. Peterson, president of the Victoria branch of the Provincial Civil Service Association; president, J. E. Umbach; vice-president, J. L. White; sec.-treasurer, W. H. Currie; executive committee, O. Morris, A. B. McNell, H. V. Mills, H. P. Hurst, W. F. Bridge, T. Banfield, F. Maynard, J. R. Mountain, T. H. Mayne, J. B. Parkington, W. G. M. Rolston.

REPORTED SOLD FOR \$100,000

Now there comes the report that Mr. Dunn has at last sold his prize beauty for the price he wanted—\$100,000—and the glad news for everybody but Baltimore fandom will be announced in due time.

The White Sox made a bid of \$50,000 two years ago. Dunn turned to the society page and continued his reading.

The Difference Between Hagen and the Average Golfer

All Leaders Win
But Seattle Has
Edge All the Way

'Frisco Still Two Games Behind Indians, With Little Chance to Catch 'em

Standings	W.	L.	Pct.
Seattle	107	86	.554
San Francisco	105	92	.532
Los Angeles	104	91	.532
Oakland	102	96	.515
Salt Lake	101	96	.512
Vernon	96	101	.487
Portland	87	107	.448
Sacramento	83	113	.423

San Francisco, Oct. 18.—Fighting with only a slim chance of winning three consecutive pennants in the Pacific Coast League, San Francisco defeated Oakland here yesterday 3-2. The Seals have four more games to play, while Seattle has three left. If San Francisco should lose any of its four games, the Northerners only one of its three, the Northerners will win the pennant. To lose the pennant Seattle must lose two of its remaining three games, while San Francisco wins all of its four.

The match was played yesterday at the Oak Bay links, and although the local ladies piled up a tremendous lead it was not sufficient to wipe out the advantage secured by Vancouver in the Spring.

The Hunting trophy is played in two halves. The first half this year in Vancouver resulted in an overwhelming victory for the Mainland and Victoria winning by half a point out of twelve. Yesterday Victoria scored 9 1/2 points, while Vancouver collected but 2 1/2. Vancouver, however, won the round by fourteen points to ten.

The scores in yesterday's match, with the visiting ladies named first in each case, are as follows:

Mrs. Gellately 6, Mrs. Philbrick 1; Mrs. Tweedie 6, Mrs. Paterson 1; Mrs. Maclean 6, Mrs. Parry 1; Miss Drysdale 6, Mrs. Hutchinson 1; Mrs. Stark 6, Mrs. Armstrong 1; Mrs. Cunningham 6, Miss Sayward 1; Mrs. Montgomery 1, Mrs. Abel 0; Mrs. Munro 6, Mrs. Wilding 1; Mrs. Chene 6, Miss Wilson 1; Mrs. McArthur 6, Mrs. Rithet 1; Mrs. Dean 6, Mrs. Pascoe 1; Mrs. Dawson 6, Miss Gleasie 1. Total: Vancouver 12; Victoria 9 1/2.

1922 First half 5 1/2 8 1/2
Second half 3 1/2 9
1923 First half 4 8
Second half 7 6
1924 First half 11 1/2 9 1/2
Second half 2 3 1/2

fortunate enough to win the Pacific Coast pennant.

If Seattle wins the pennant and St. Paul wants to come to Seattle, the message continues, "to play Seattle under the terms of the agreement outlined in your letter of October 14, Seattle will be glad to accept their proposition."

Thomas J. Hickey, president of the American Association, has already wired Williams that St. Paul does not want to play Seattle anywhere else but in Seattle, in case the Indians win the pennant.

Los Angeles, Oct. 18.—President Harry Williams, of the Pacific Coast League of baseball clubs last night announced the receipt of a telegram from Charles Lockard, president of the Seattle club, agreeing to a game between a car driven by Joy and McLeod's horse. The car was badly wrecked, losing both front wheels.

Seattle, Oct. 18.—A broken collarbone for young Martin McLeod, injured to the horse he was riding, which made it necessary to shoot it, and a cut on the head which sent George Joy temporarily to the hospital, were the results of a collision on the Granite Road last night between a car driven by Joy and McLeod's horse. The car was badly wrecked, losing both front wheels.

Spencer's Hoopsters
Team Holding Dance

The members of the basketball team of David Spencer Limited are holding a dance in the Chamber of Commerce auditorium on Tuesday evening at 9 o'clock. Ozard's orchestra will be in attendance.

The men's and ladies' teams will hold their first practice shortly and expect to have two of the strongest teams in the city this season.

Vancouver Lady
Golfers Win Cup
For First Time

Hunting Trophy Crosses Gulf; Local Ladies Made Game Effort to Hold it

For the first time in three years the ladies' golf team of Vancouver, picked from the Shaughnessy and Jericho golf clubs, was successful in winning the Hunting Cup from a team from the Victoria and Colwood golf clubs.

The match was played yesterday at the Oak Bay links, and although the local ladies piled up a tremendous lead it was not sufficient to wipe out the advantage secured by Vancouver in the Spring.

The Hunting trophy is played in two halves. The first half this year in Vancouver resulted in an overwhelming victory for the Mainland and Victoria winning by half a point out of twelve. Great Interest Is
Taken In Meeting
Of College Teams

Queen's, Canadian Champs, Meet 'Varsity To-day; All Eastern Leagues in Action

Ottawa, Oct. 18.—Rain this morning threatened to mar the important rugby football games held in Eastern Canada for this afternoon, but despite poor weather prospects in Ottawa, Toronto and Kingston, where the games will be played, large crowds are expected to pack the stands.

Though Montreal reports have stated that the Montreal A.A.A. substitutes are weak, Toronto Argos expect to find them at top form in their "Big Four" fixture at Toronto and are not taking much stock in this report.

Toronto, Oct. 18.—For the first time this season all three rugby unions in Eastern Canada are in action to-day. The only side teaming McGill, one of the intercollegiate union, and Varsity, in the O.R.F.U. McGill has arranged an exhibition game with Royal Military College, while the majority of Varsity's O.R.F.U. team will be taken along with the intercollegiate squad to Kingston, where the most important games of the day will be played.

The Varsity-Queen's game takes precedence owing to it being the first real test for the twice Canadian champions this year. While the intercollegiate game is given first place, the other three senior league fixtures are of vital importance to the teams engaged.

Teams Keyed Up

In the two "Big Four" games, Tigers at Ottawa and Montreal at Argos, the Ottawa and Montreal Argos must win to stay in the running, as a defeat will practically eliminate each one of them. Ottawa's position is most vital, as they have already lost their first two starts, even in their two fixtures. An Ottawa victory will put Tigers on even terms with the winners of the game in this city, while the Senators will share third place with the loser of the Montreal-Argo game.

Argo youngsters should rise to the required height against the Winged Wheelers, although it is said they will have to be at their best to turn them back.

There is another senior game in Toronto to-day, Hamilton Rowing Club, O.R.F.U. seniors, champions, meeting Balmy Beach at Scarborough Beach.

AUTO DRIVER KILLED

Charlotte, N.C., Oct. 18.—The body of Ernie Ansterberg, famous automobile race driver, who was killed Thursday while on a tryout spin on the new Charlotte speedway, will start to-day on its journey to his old home town of Concord, Mich., where funeral services will be held under the auspices of the Masonic fraternity where he was a member. Mrs. Ansterberg, who is in Los Angeles, will join the remains at Chicago.

UPLANDS GOLF CLUB

Prizes won in the Uplands Golf Club handicap tournament which was played on the last two Sundays, will be presented to the winners at 10 o'clock at the club house.

Next year he went to England

Hagen's Philosophy
Is Need Of Golfers

Those Who Hope to Succeed on Links Should Read and Digest Advice Offered By One of Greatest Living Players; Law of Averages Will Make Up for Your Bad Lies, He Says; Don't Blame Your Clubs for Mistakes

By ROBERT EDGREN

Nobody ever heard Walter Hagen offer an alibi after a losing match in golf.

Hagen has a philosophy of his own that he applies to the game.

The philosophy does not include excuses, annoyances, worry or loss of temper.

Hagen never broke a driver by pounding it on the ground, or threw his putter into a tree, or tore up a score card in the middle of a game. He isn't built that way.

That's why Hagen has won many golf championships, and why he this year won the British Open a second time.

"There is no such thing as hard luck in golf," Hagen says. "I make the breaks myself, don't I? If I played better the breaks would favor me."

"Yes, I've lost strokes by getting into a trap, but that was my fault. If I'd played my shot right, I would not have been in the trap. Nobody can play all shots right. I just go along and expect to average up as well as I can."

When Hagen slices or pulls one into the rough he doesn't lose his smile.

"Wait," he says, "I may have a better lie there than on the fairway."

TRAPS DON'T SCARE HIM

"It isn't always hard luck to get into a trap," Hagen says. "Often I make a better approach from a trap than I would from the fairway. The average golfer is scared when he finds his ball in a trap, and that hurts his game. I'm not scared and that helps my game. It's nothing to worry over; the others will throw away some shots too. I never blame my club my poor shots. The club doesn't make them—I do. If I'm tired it's a pretty fair guess that my opponent is tired too, so that doesn't make any difference."

I've seen Hagen laugh when he missed a short putt, although he is a very good putter.

"I've missed those easy putts sometimes," he says. "I don't think any man living can get them down all the time. I don't let it get my goat. If I putt well and the ball doesn't go down, I don't think that's all right. I'll sink a long one later on and make it up."

"Missing a short one doesn't make me sore. I don't think I've ever missed a hole everything. A good putt might roll away from the hole, and a bad one might roll in. It's the average that counts, and I know the average will run according to the way I play the game. In the long run I'll get what I earn, no more and no less."

IS NOT MECHANICAL

Hagen doesn't believe in being mechanical in putting. He doesn't think of having a rule covering the length of the putter stroke for different distances and conditions of the green he always tries to "feel" his putts.

In a match Hagen likes to start easily and not "fight" until he has to. That is why he always has a cushion in reserve for a fighting finish, and why his last nine holes of tournament play are usually his best. He often comes out winner when he has seemed to be hopelessly out of the running.

A NATURAL ATHLETE

Hagen came from far behind and on the last green had to sink an eight-foot putt to win by a single stroke. He sunk the putt, sinking an eight-foot putt isn't extraordinary in itself, but it's something to do when a championship depends upon it.

Walter Hagen is a natural athlete. Born in Rochester, N.Y., he was ambitious to become a ball player. He did play very good semi-pro ball over the years as a boy team, and to get five dollars a game. He was a pitcher, and had the unusual ability to pitch equally well with either hand. But when he picked up golf he forgot his ambition to be a ball player. He started by caddyng at the Rochester Country Club, and learned enough about golf to win a medal there in an amateur tournament.

Hagen is now thirty-two. His first big professional tournament was in 1914, where he finished second. In the National Open that year he tied for fourth.

Then in 1914 he won the National Open, and several sectional titles. He won the National Open again in 1915, after a play-off with Mike Brady, at Brae Burn, near Boston.

He went to England first in 1920 for the British Open. He finished twenty-six strokes behind the winner. He started with an eighty-four, and was advised to keep on playing as he might finish third or fourth.

TRIED TOO MUCH

"That doesn't mean anything to me," said Hagen. "If I can't finish first I'll just as well finish fifth."

So he went out in the afternoon to take long chances on all his shots, and it didn't work. After the game he met Dick Martin.

"This proposition was harder than you thought," suggested Martin.

"No," said Hagen. "It was easier. I've learned something here at Deauville. I thought I had to do something out of the ordinary to have any chance to win. I didn't realize that they were just about like our players. I'll go over to France for the French Championship and win it. I'm not playing bad golf. All I have to do is play my game; that's all. I play better than I know how to play."

At La Bouldie Hagen won, defeating Mitchell and all the best British players.

Next year he went to England

again and finished sixth. That was the year Jack Hutchison won the British Open.

Perseverently, Hagen crossed again in 1922, and this time he won the British Open title. That year he missed it by one stroke. He was won by Arthur Havers. This year he won by one stroke. He was the first American-born golfer to win a British Open, and he has won it twice in three years. After winning in England he went to France and finished second in the French Open championship.

The British Open has been contested for sixty years. In all that time the title has left England only four times, being taken away twice by Hagen, once by Hutchinson, and once by Massey of France.

WANT PUBLIC TO REMEMBER

Last year in the American Open Championship Hagen ran far behind Bobby Jones, who was playing winning golf, and Sarazen. He kept on playing, but instead of trying to finish close to the leaders tried out a lot of long-chance shots and lost many strokes. When one of his friends asked him why he didn't play cautiously and finish close to the leaders he could Hagen laughingly said: "Finish second and they soon forget you. I'm not fighting Bobby or Gene. It's first or nothing with me. If I know I can't win I'm going to have what fun I can out of it."

Walter Hagen likes hunting, especially for quail, is a fairly good trap shooter, and a good marksman. He can play any game well. He is a great athlete. Billy Gibson, manager of Benny Leonard, says Hagen could have been a champion at boxing, because he has everything that makes "class in the ring—nerve, gameness and physical strength."

He believes in training and physical condition.

Before the Open at Deauville he went there and spent several days running around the links, not playing. His running was for the purpose of building up his stamina, and he was a little over. He trained at Belle Air last winter, to play in the British Open this Spring. He cut out smoking, ate carefully, and ran to take off about six pounds of extra weight.

"Fat never helped anybody to win anything," says Hagen.

Sale Commences Monday, Oct 20
DAVID SPENCER, LTD.
VICTORIA, B. C.

DAVID SPENCER, LIMITED

CHEF FOR BACTERIA—One of the strangest jobs in Washington, D.C., is that held by L. J. Bender. His work is to cook for the strangest assortment of boarders ever assembled under one roof. He prepares the meals for trillions of bacteria kept in the laboratories of the Public Health Service. Early each week he buys and cooks more than 100 pounds of the finest beefsteak, plenty of fresh eggs, potatoes, gelatin, milk and other edibles. No human gets a mouthful of this food. It all goes to the disease bugs that the scientists in Washington keep on hand for experimental purposes. The photograph shows Mr. Bender at work in his laboratory.

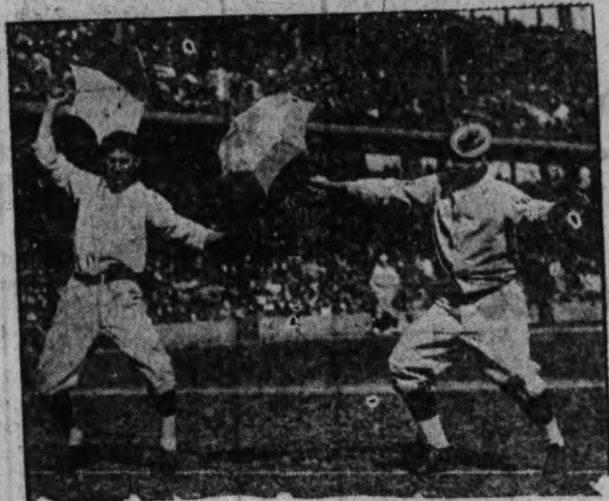

HOST TO THE PRINCE—This is Bayard Tuckerman of Hampton, Mass., who is entertaining the Prince of Wales in the East on his way back to England.

HIS MAJESTY—Would you know a king if you met one? Suppose you ran across the gentleman in the picture. Wouldn't you take him for a congressman or a merchant? Well, he is none other than King Albert of Belgium in civilian clothes, taken just after he had flown to London.

BEFORE STARTING ACROSS ATLANTIC—This picture of the ZR-3 over the former Kaiser's palace at Berlin while on a trial trip, was taken shortly before the giant dirigible started for the United States.

NICK AND AL AT WORK—Nick Altrock (right) and Al Schacht, baseball's greatest jesters, did their "stunt" at the world series again this year. The two Nat comedians had a lot of new acts, too.

WESTWARD HO!—The Shenandoah passes over the White House on its epoch-making flight to the Pacific Coast.

HOUSE OF BISHOPS MEETS—Bishops in procession from the Cathedral of St. John the Divine in New York, where the House of Bishops convened to elect four new members of that body.

MORE POLITICAL TROUBLE—Senator Caraway of Arkansas, who claims to have in his possession a speech in which he alleges United States Secretary of the Navy Willoughby expressed the opinion that "the negro issue" was the only one dividing Republicans and Democrats.

TEXAS FIGHTS NEW CATTLE EPIDEMIC—Ranches of Texas have become slaughter houses. Thousands of cattle are being killed to prevent the spread of the dread foot-and-mouth disease. Rev. William States Jacobs, a Houston minister, lost a herd he valued at \$20,000. It was pure-bred Brahman stock crossed with the native cattle. Steam shovels worked four days digging trenches, as shown in this picture, more than a mile long in which to bury 1,900 cattle, shot in the Ellington district alone. The animals were driven into the ditch by cowboys, then shot down by a squad of Texas rangers. Each man used two rifles, changing guns when the barrel grew too hot.

CAN'T KICK—George Fisher, seventy-five, wealthy farmer of Falls City, didn't want his children fighting over his estate after his death. "He called all five together and staged a little lottery. Everybody got something—but the choicest piece of land went to the eldest, Mrs. George Pritchard (above) of Abeline, Kas., when she drew the lucky number from her father's hat. Her land is worth \$50,000.

FROM NOVA SCOTIA TO ROME—When George H. G. Smyth arrived in New York in his canoe he had paddled 1,550 miles in forty-three days on the water from Sydney, Nova Scotia. He intends to go to London and then paddle his canoe to Rome.

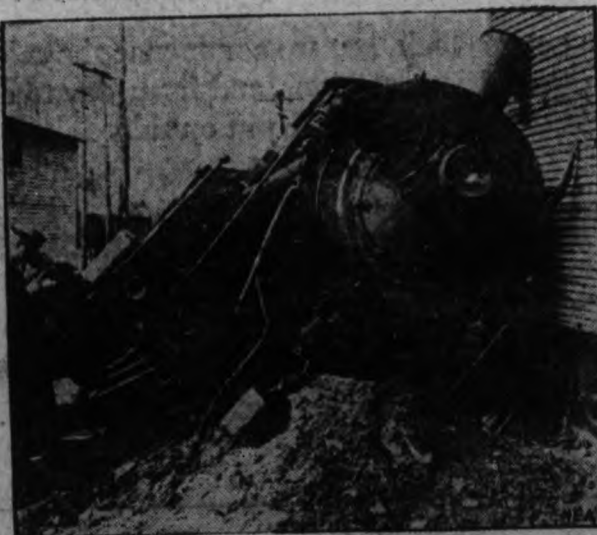

BRINGING IN THE WOUNDED—Here the Chekiang forces in China's civil war are seen bringing their wounded into headquarters. From Lihoh, it was a painful trip of twenty-five miles of bogging on trucks or in the back seats of commandeered touring cars. On arrival at headquarters, the Chinese Red Cross took care of them. The latter organization has not, however, been close to the firing line.

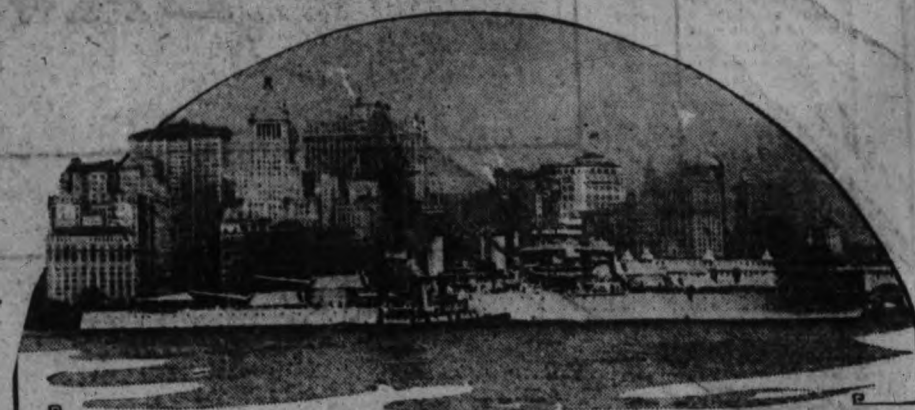

WHAT'S THE TIME?—If you wish to know what time it is in Peking, Amsterdam or Petrograd just get Attorney Simon Kugell of Boston on the long distance phone and he'll tell you. He has one of the most ambitious clocks in the world. It has nine faces and tells the time in San Francisco, Peking, Petrograd, New York, Greenwich, Paris, Madrid, Amsterdam, Boston.

WASH DAY NOT ALWAYS MONDAY—Congestion is so great in New York's East Side that tenement dwellers take turns in using its sunlit spaces. This picture could have been taken any day, for every day is wash day there.

LOCOMOTIVE GOES "LOCO"—Leaning drunkenly against a house, this 210-ton railroad "giant" has no alibi to a charge of trespassing. It jumped its track at Throop, Pa., near Scranton, and invaded a private back yard. No one was injured.

PUZZLE PICTURE—FIND NEW YORK'S SKYLINE—When a big warship such as this one, the West Virginia, gets in the foreground the famous New York skyline has real competition as this picture shows.

VICTORIA, B.C., SATURDAY, OCTOBER 18, 1924

CUMBERLAND IS DISTRICT OF INDUSTRIAL FUTURE

Mining and Agricultural Possibilities Are Excellent in Vicinity

CUMBERLAND'S ADVANCE HAS COINCIDED WITH THE DEMAND FOR ISLAND COAL

Checked by Use of Fuel Oil, Bunkering Business Has Been Reduced, But New Uses of Shale and Pulverized Coal Promise Remedy

Cumberland presents to the visitor one of the most encouraging welcomes of any of the coal mining towns on Vancouver Island, certainly none have a finer street than Dunsmuir Avenue since the recent improvements. While its future is intimately bound up with the operation of the mines of the Canadian Collieries (Dunsmuir) Ltd. in the vicinity, there is no doubt that the lumbering and industrial potentialities of the neighborhood hold great promise.

Like all the coal mines of the Island, the production has been curtailed by the competition of the fuel oil importations from California, which have reduced the bunkering trade at Union Bay, the shipping point, and have revolutionized the fuel business on this Coast. As this colliery connection was built up from the bunkering trade, the effect of the competition is felt at Cumberland more than elsewhere.

OIL BEARING SHALES

Efforts are being made to treat the oil-bearing shales, and specimens have been sent away for analysis, the experiments which have been conducted at southern points with shales notably in California and Oregon having held out considerable promise of development in securing oil. Pulverized coal may also offer some relief to the future of the mining industry on Vancouver Island.

The company is at present operating Mine Nos. 4, 5 and 6, at various points between Comox Lake and the city. Considerable attention in connection with development work has been done in regard to No. 5 mine on the Farm seam.

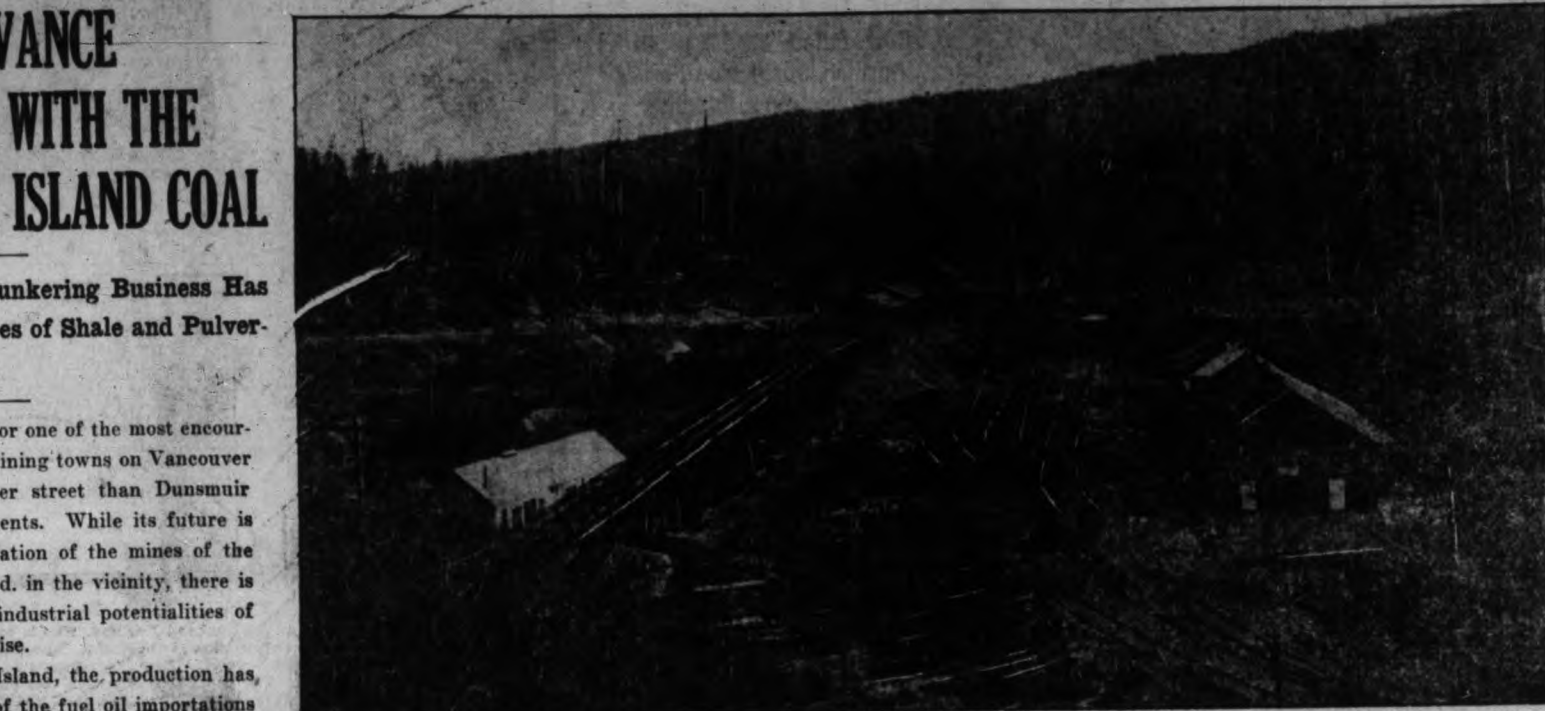

Last year the company employed 754 persons, nearly 800 of whom were underground, and produced 276,200 tons of coal. The effect of the bunkering trade will be appreciated when it is stated that the collieries in this district, including No. 7 mine at Bevan, not now in operation, produced 440,000 tons in 1921, and the number on the payroll was correspondingly much larger then.

At Union Bay the company maintains its works and repair shops for its rolling stock. This is the scene of its coke ovens, and for that reason received the greatest favor when the question of a blast furnace to smelt iron and magnetite ore for iron and steel was under consideration some years ago. Deep water, convenience to the markets and abundant fuel rendered Union Bay particularly suitable for the development of the industry.

Since 1913 the company has eliminated the use of steam, and power is obtained from a hydro-electric plant. Power is taken from Comox Lake, about three miles from the city, carried through a flume to the power house at Puntledge River, the units developed being capable of development power being generated at 12,500 volts and transmitted to the substations at the mines where it is transformed down to 2,200 and 440 volts for use.

Cumberland, Courtenay and Union Bay are supplied from this plant.

In the Comox field, which is about 750 square miles, the coal occurs in several seams in a greyish white sandstone, which directly overlies the metamorphic volcanics. Three of the seams have been mined. Since the surface upon which the sandstone was deposited was very uneven, some of the higher irregularities remained, says Dr. D. R. Dowling, of the Geological Survey, above the deposited level during the formation of the lowest coal seam, which occurs near the base of the sandstone, hence the lowest seam is frequently cut out by knobs of the metamorphic rocks. The measures are rather regular. In general the structure is a simple monocline with a fairly uniform dip. There are, how-

ever, many small folds, and a few faults, beside many sharp rolls, pinches, and swells in the coal seams. Near where the porphyry has broken through the measures the coal is broken and partly coked.

The Comox coal is coking, bituminous and the highest in fixed carbons of all the Vancouver Island coals. Extensive mining

in that area has been carried on since 1888 in the central portion of the basin. An earlier attempt to mine was made further south in the seventies.

Frank Sawford, in a careful analysis of the use of electric energy at the Comox collieries, says in part:

"More than ten per cent. of the output of the mines was with the

old plant consumed in the production of an inadequate amount of power. No coal whatever

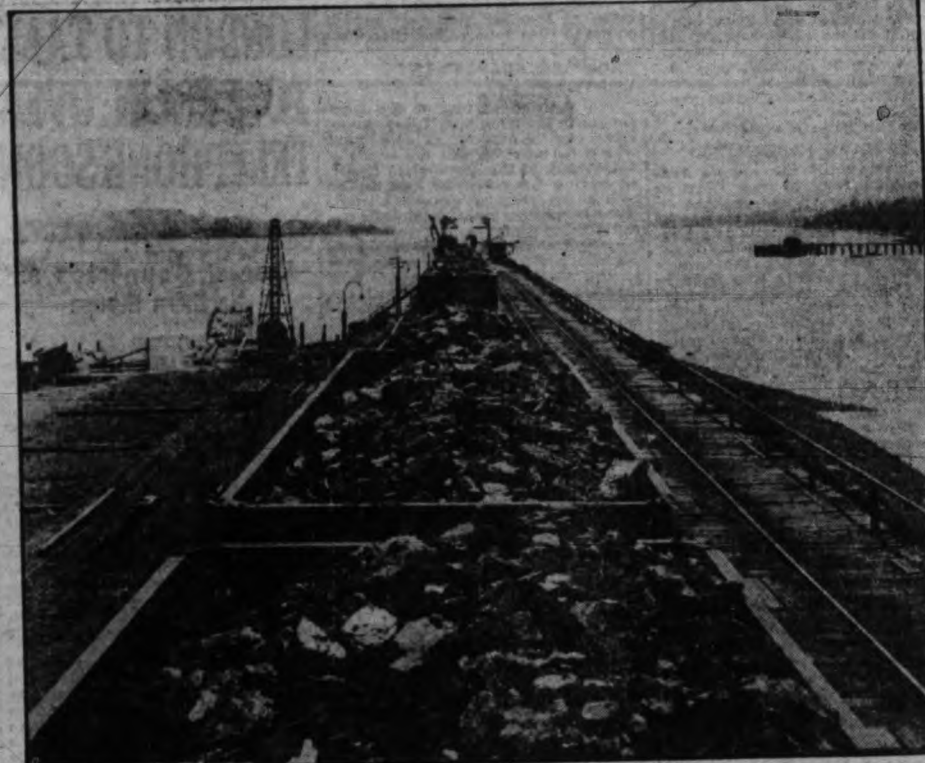

Upper—General view of No. 4 Mine, Cumberland.

Middle, left—No. 5 Mine at Cumberland.

Middle, right—Approach to loading wharves, Union Bay.

Lower, left—Employees' Social Club, Cumberland.

Lower, right—Comox Lake.

(December, 1922) is now consumed at the mines except for railway locomotives. The old

plant included more than thirty boilers, fired by forty-two stokers with an average payroll of \$2,000 per month. The total cost of raising steam alone for these mines, allowing \$2 per ton for the coal used, amounted to nearly \$10,000 per month—this does not include cost of maintenance and supplies.

"As compared with this the

average operating cost with maintenance for power amounts to less than \$2,000 per month. In the figures given both for the old and new plant, no account has been taken of interest charges on the investment; nor in the case of the new plant has allowance been made for the revenue derived from the sale of electrical power to outside parties."

HAS OTHER CLAIMS TO FAME BESIDES MINERAL WEALTH OF DISTRICT

Cumberland Has Abundance of Hydro-Electrical Energy to be Developed in District; Valuable Timber to be Exploited Later

Cumberland is generally associated in the minds of the public with coal mining, but the people of the district are beginning to realize the value of the tourist business of the vicinity, particularly Comox Lake. This beautiful sheet of upland water, one of the finest of Vancouver Island's inland waterways, is walled in by towering mountains and presents a rugged and picturesque appearance, with overhanging cliffs. Several fine trout streams enter the lake. One of the most important features of this area will eventually be developed when the road is built connecting Comox Lake with Alberni through virgin timber, following for over twenty miles natural waterways, and which would eventually link the West Coast by way of the existing road to Beaver Creek.

People who have visited Comox Lake, and very few have done so except residents of Cumberland and district, are loud in their praise of the locality. As would be expected of an area so close to the backbone range of Vancouver Island, and within distance of the highest peaks yet discovered on the Island, the air is colder and drier than at many points on the East Coast.

WATER POWER

Just as in the same way the wonderful water powers of the territory tributary to the Alberni are awaiting industrial development, Cumberland is situated at the centre of an area which is capable of great development electrically. While the Canadian National Railways some years ago located a line via Cowichan Lake, Alberni Canal, and Comox Lake, it is not expected to see construction for a long period in that area, so that private development will have to improve transportation in that section, and open it up to lumbering enterprise. Other industries which depend on electric energy are also regarded as potential users of water power in the future. The Puntledge development of the Canadian Collieries is at present the only electrical energy developed in the area.

The town draws much of its fuel supply from the rich agricultural district adjacent to Comox and Courtenay, the latter as the present northern terminus of the Esquimalt & Nanaimo Railway having become the chief shipping point.

Owing to this fact, Cumberland is the only important settlement on the Island not in direct touch by passenger train with Nanaimo and Victoria, the communication with Royston, the nearest point on the E. & N. system, being on the Wellington Colliery Railway of the Canadian Collieries Ltd.

As already indicated, railway communication would result in a great change the lumbering possibilities of the area, fine stands of fir, cedar, and hemlock being in close proximity.

Cumberland owns its water supply, while the lighting is provided by a company using from the Puntledge development, the same source being used at Union Bay and Courtenay.

HAS OTHER CLAIMS

The incorporated area of Cumberland is the smallest in British Columbia, only forty acres in extent, having a population of about 1,100. There are at least as many in the adjacent district.

The public services of the city are exceptionally good for an area of that character, and the athletic and social standing of the city is high. Like all the Island mining towns its triumphs in the football field and in the first aid and rescue work have been notable.

DISCOVERY OF READGAR

Readgar, the well-known arsenic sulphide, was reported by a prospector some months ago to have been located in the neighborhood of Comox Lake, but as far as is known the deposit has not been developed. In view of the great value of this arsenide, the discovery may have great potential future.

COPPER PROSPECTS

To judge from showing of copper ore in Strathcona Park, and at points south and west of Cumberland, a future exists in connection with metalliferous mining, though little has hitherto been heard of this section. The construction of a railway in this heart of the Island, and the Esquimalt & Nanaimo Railway has for several years possessed a charter for that purpose, will be the means of placing Cumberland in touch with the mining possibilities of the Ash River and district.

AUTOMOBILE NEWS

SAFETY DEVICE IS GIVEN RIGID TEST

Signal Which Throws Warning 150 Yards Proves Its Value to Officials

A successful demonstration of the Sunset Safety Signal and other commercial safety devices was carried out last evening in Beacon Hill Park, before representatives of the Provincial Government, provincial and city police. A large number of motorists were also present.

The Sunset Safety Signal was placed at a point on the dark stretch that leads into the Bear pit so that a motorist coming along the road could pick it out at 150 yards. Next Monday evening all the auto dealers are requested to be on hand at the Atkinson Motor Garage to attend a meeting at which plans will be discussed for the holding of Safety Week which will start next Tuesday. Demonstrations of the safety devices will be given to the public in an effort to decrease danger of night driving.

What You Should Know About Chassis Lubrication

During the last few weeks I have been giving you some pointers on what to inspect when buying a used car. If you have read these articles, you will have noticed that the mechanical condition of the car was of even more importance than the outside appearance.

If you have been careless about watching the level of the oil in the crankcase and allowed it to get too low at times the engine may have run so hot that one or more of the cylinders have become fouled and causing the engine to misfire. At the same time you find the engine has to have the carbon removed frequently.

When you sell your car, if the buyer knows how to inspect it, he soon discovers the scored cylinder and you find it very difficult to make a sale. If you are careful to keep the oil in the crankcase at the correct level all the time, you not only keep the engine in good condition, but find it much easier to sell or trade in your car.

Next in importance to the lubrication of the engine is the lubrication of the steering gears and front axle connections. Most owners are careful to watch the lubrication of the engine but comparatively few worry very much about other parts of the car. Just go out to your car and have a look at the steering knuckle pins, spring shackles, king pins, etc., and at least eight out of ten are going to find that the connections are covered with a coating of dry, hard grease and dirt, and have not been touched for some considerable time. If you take out the pins or bolts and examine them, you will more than likely find they are quite dry and innocent of lubrication. If the car has been in service for six months or more, you will also find that the connections are beginning to get a little worn or loose.

Before long you notice that your car develops a series of noisy rattles and groans that are very annoying. All connections that are exposed under the car must be lubricated very frequently to prevent water and grit working in. When you screw down a grease cup or you not only lubricate the bearing but you also force out any grit or dirt that may have found its way into the bearing since the last time you lubricated it.

Every day you read of automobile accidents. It might surprise you to know that a number of these are the direct result of lack of lubrication. If the lubrication of the steering gear is neglected, it soon makes the steering stiff. Perhaps at the critical moment you have to act quickly to avoid an accident and find the steering is so stiff that the connections are not lubricated.

If the lubrication of such parts as the steering knuckles and wheels are neglected, the bearings soon become worn. These parts are subjected to a considerable amount of jarring and vibration and if they are worn badly, the vibration causes them to crystallize and become brittle. When this action continues for a long time, it is liable, when you strike an obstruction or deep rut, to cause the wheel spindle or the steering knuckle to break. If the wheel spindle breaks, the wheel comes off. If a steering knuckle breaks, you lose control of the car. In either case a serious accident is practically unavoidable.

Remember wear cannot take place if the bearing surfaces are kept apart, and all that grease or oil does to form a film or cushion of oil in the bearing which prevents the metal surfaces coming together. When you neglect to keep a part well oiled or greased, the two surfaces make a metal to metal contact, then wear starts.

If all parts of the chassis are lubricated regularly, they will give little, if any trouble, and only require replacing at long intervals. You will find in the instruction book you got with your car, a lubrication chart which specifies how often to lubricate each part. If you follow these instructions you will find your car will run smoother and quieter and your repair bills for replacements will be few. In addition to this, when you wish to sell your car, it will be in such a condition that it will command a good figure.

around the terminals, causing starting and lighting troubles which necessitate replacement of the parts affected. To avoid this difficulty, keep the connection tight, free from corrosion and properly greased. Failure to care for these minor details may prove expensive as far as repair bills are concerned, but it is well to take the precaution and avoid the annoyance of an inoperative battery, which usually is discovered when the battery is needed most.

Rain and Frost Hurt Batteries

Fall Weather, Mud Puddles and Mud Make Trouble

Rainy weather is bad for storage batteries, and it is especially so in the Autumn, when there is an occasional frosty night along with it.

The battery, down under the floor boards, is in a fine position to get a shower bath of dirty water from the road puddles every time the wheels pass through them. Even usually these splashes deposit a film of dirt over the tops of the cells, and this often works up into the terminal connection, causing a faulty connection.

While no serious damage will result from an accumulation of dirt on top of the battery, it is going to do no good. Reasonably soon a blue-green and yellow deposit will form

PREFERENCE WITHIN EMPIRE WOULD LEAD TO MORE BUSINESS

John D. Mansfield Believes in Trade Pacts to Assist Manufacturers

"The Chrysler Motor Car Company of Canada Ltd. is expanding its Windsor plant in order to be ready for the great demand expected for their output in Australia next year when the preferential tariff arrangements come into effect," said John D. Mansfield, president and general manager of the Chrysler factory in Canada. Mr. Mansfield has been visiting here for a few days and left only yesterday afternoon.

While here the automobile manufacturer expressed himself as satisfied with the reputation the Chrysler car had won so quickly, and the trade in the West of Canada was brisk, he asserted, and satisfactory. He was assured of better business in the future, for although the Chrysler was accepted, as it should be, yet it had not won such wide recognition as it was bound to do in years or months to come, he stated.

EMPIRE PREFERENCE
 Mr. Mansfield said that the preferential tariff plans which would unite more closely Canada and Australia would some time or other be applied to the whole of the British Empire, he hoped, and when that time came he was certain that it would be a great benefit to the manufacturers within the Empire.

Mr. Mansfield believes the Australian agreement to be the first of a series which will eventually link every part of the Empire in preferential trade. He thinks that if the Labor Party is overthrown in the forthcoming elections in the Old Country, preferential tariffs are bound to follow between England and the different Dominions.

Under the conditions of the McKenna tariff, 1,500 Maxwell cars were sold each year in England, he said. Since August, when the McKenna tariffs were abolished, his company's business with England had shrunk to a negligible size. Under a preferential agreement with England the Maxwell sales would be restored to the former figure, Mr. Mansfield said, and about the same number of Chrysler cars would be marketed in addition. This would represent an increase of about \$7,500,000 worth of business a year.

GROWING PRODUCTION
 "Production reports from the Chrysler Motor Corporation indicate that the company has not only been able to maintain its recent rate of one hundred cars a day but has bettered this mark for the past several weeks, with every sign pointing to capacity production by the end of April," said Mr. Mansfield.

"For the last several weeks of March the Chrysler plant was turning out one hundred cars every day. In the past few weeks the average has been 150 per day."

"Capacity production of over 150 cars daily is the present average of the Chrysler factory. "Orders on hand fully indicate that it will be necessary to maintain this peak production for months to come," said Mr. Mansfield.

"Although the production gains have to some extent taken care of back orders, new orders have also been received in increasing proportions. Cars are now being delivered to buyers and are beginning to dot the highways of the country from coast to coast."

"Those well acquainted with the automobile industry have continuously remarked upon the speed with which Chrysler entered into its very ambitious production programme. Usually when a new car is produced it is a matter of many months before peak production can be reached, but the Chrysler Six, first shown at the New York Automobile Show, hit its capacity mark just four months after the date of its introduction. Because of the extreme care with which the Chrysler is known to be built, this record becomes all the more remarkable," the president asserted.

SAFETY
 A Few References in Praise of GLARE-O-NO

"We take much pleasure in recommending the Glare-O-NO. We were convinced that it was worth the weight in gold after meeting just one motorist with strong head lights."

"Regarding the 'Noglaro' device, I will say that while I have only had this on my car for a short time and have not had sufficient time to give it a thorough trial, the only thing I have had occasion to use it for was driving against the sun, and found it excellent in this respect."

"With reference to your device for Autos known as 'Noglaro,' I have had one on my car for several weeks and have experimented with it on long night drives up the Island. It is a very excellent device and has saved me a considerable amount of trouble and possibly a few mishaps. I believe that no car is complete without one and would strongly recommend it to any of your prospective purchasers."

"I purchased the above attachment for my car from you and am pleased to say I have found it most useful, not only during night driving, but also when driving in strong sunshine. The attachment is cheap at the price and I can recommend it to anyone."

"I consider the \$2.50 I paid you for this, the best \$2.50 investment I ever made. I would willingly have paid \$10.00 for the same contrivance had it been possible to procure one."

EXPERT TALKS ON MOTOR PROBLEM AS IT AFFECTS WORLD

One of the best known automobile transportation experts of America is Major Elhu Church, transport engineer and Port of New York authority on the transportation situation of that city—and incidentally the entire situation of motor transportation as it so vitally affects the entire world, and America in particular. Major Church is an advocate of good roads, and in a recent article on this subject expressed himself as follows: "No matter how good a vehicle may be, its service depends upon the roads it has to run over. Speed can be nullified by congestion on streets and highways. Accidents and delays are bound to occur where there is inadequate traffic supervision. But no matter how good the supervision may be," he goes on to say, "the roads must be broad, even, and properly graded if the maximum of service and the greatest amount of safety in driving is desired."

COMING OF TAXIS

In speaking of the taxi car on a commercial basis, which has been felt and seen in practically every sizeable city of America, Major Church states: "The taxi has created street problems in many cities. It is carving out a future for itself in town and country. Passenger buses supplement the street car. Especially in the running to and from the suburbs of big cities is the taxi and bus coming to be recognized as something really indispensable."

Not only do passengers benefit from the motor transportation which is breaking into the rule of things most modern but freightage, too, is accomplished by means of motor trucks. Trucks have replaced the horse in "short-haul" work he asserts.

"When the war came we saw the value of trucks," said Major Church. "We learned of their utility and their immense value under circumstances the most arduous. There is no freighting a motor truck, and although a horse is something reliable and dependable, with a fine courage yet there is no comparison with horse-drawn vehicles and the great buries which trundled over the roads of France and Belgium rushing khaki to the line."

NEW ERA DAWNS

"When peace came the transportation of freight over long distances by motor vehicles was an established procedure," said Major Church.

"True, the railroads got back a lot of the business that they had temporarily lost, since ten-mile railroad costs are low and motor ton-mile costs are relatively high. Business men who had experimented with the truck had found, however, that the cost of the line haul was only part of the story. Goods can often be sent by motor without the cost of expensive grading or boxing. A door-to-door service frequently saved costly handling. In many cases the service was more prompt and certain. It was not subject to railroad delays. All these advantages had a money value that offset the higher line-haul costs of the truck," he continued.

"Naturally enough, this fact had a vast influence upon transportation after the war. Now truck transportation is regarded as something wholly reliable, but more than that, it is a great improvement over some

modes of freight handling, which, in the progress of the world, have been outgrown and left behind.

"Most transportation costs are connected with terminal operations. The cost of getting goods to and from railroad stations, or steamship piers, warehouses, factories and markets is often greater than all the other expenses connected with their transportation put together. Congestion and delays, time lost loading and unloading, time lost on the streets make this so," Major Church goes on to say.

THAT ROAD PROBLEM

"The whole future of motor transportation depends on roads, though not in the ways that most people think. The increase in the number of cars and trucks has brought many highways to a point of saturation. Congestion is often intolerable both for its delays and its dangers. The present rate of increase of traffic is daily making the situation worse. What, where, and how about it? How can the capacity of existing lines be increased? Is it feasible to move more traffic with present facilities," the expert queries.

"The situation is far too important to be considered in a bit-or-miss fashion," he explains. "It is not a local problem, though often treated as such. It is a cash of furnishing adequate right-of-way road bed and service to handle a traffic every bit as important as that carried by the railroads. The railroads co-ordinate their activities and employ the best brains obtainable to help solve their difficulties. Highway location, construction, maintenance and operation must be treated in the same manner," the expert queries.

PROBLEM OF UPKEEP

"The proportion of the expenditures that public policy dictates should be made from taxes and the further amount, where necessary, to be collected from users of the highway, are economic matters, and economic considerations must govern. No longer will the question be: 'How much can the ratepayer afford to spend on highways of a type more expensive than his local requirements make necessary?' It is now the question: 'What highway expense does such traffic justify? Does the earning power of the road based on service rendered, and paid for by those who profit by it, warrant the cost?' continues Major Church.

"When this situation is reached your feet are on solid ground. This is engineering, not guess work, propaganda and politics. It is possible to decide whether it will pay to reduce a grade or eliminate a curve because of the higher speed or heavier loading that the improvement will make possible. Then engineers will determine the relative costs of operating cars and trucks over rough and smooth roads and will know what charge can be made for the use of the good roads and how much can be spent to build them," the expert says.

"Motor transportation is going to develop beyond anything we can visualize. It will profoundly affect American life and business. Its growth will make marked changes in our cities, towns and highways. Where all this is brought about in a rapid and satisfactory manner by business acumen, engineering ability and a sound adherence to economic principles, or whether it comes slowly in an expensive and unsatisfactory way depends on the foresight, ability and character of the men who direct the development," he says in conclusion.

What Every Fan Should Know About Radio Receiving Circuits

There Are Few Standard Circuits, But Many Variations

By SIDNEY ELBER

The greatest drawback to the development of radio-frequency amplifier circuits is the inherent inadaptability of American vacuum tubes for such service. Despite the fact that domestic tubes are extraordinarily uniform detectors and audio amplifiers (taking in regard the huge quantities in which they are produced), they do not give entirely satisfactory results in radio-frequency sets.

Examine Fig. 1. Here we have the essential components of a basic R.F.

namely, regeneration and then oscillation. Whereas, in the regenerative set this action is desirable and easily controllable, in the R. F. set it is decidedly undesirable and difficult to control.

Regeneration, as any experimenter knows, is a feedback of energy from the plate to the grid circuit of a tube. Some coupling or transforming energy is necessary. In tuned plate outfits this is furnished by the capacity or condenser effect of the tube

tube can be represented by the condenser C in the diagram.

The high tube capacity may also act as a dead short circuit on the R. F. circuit, as the radio signals can press right through the grid and plate from transformer to transformer without being amplified at all. This explains why the filaments of the first two tubes of a great many commercial radio-frequency receivers can be turned completely out without affecting the reception from local

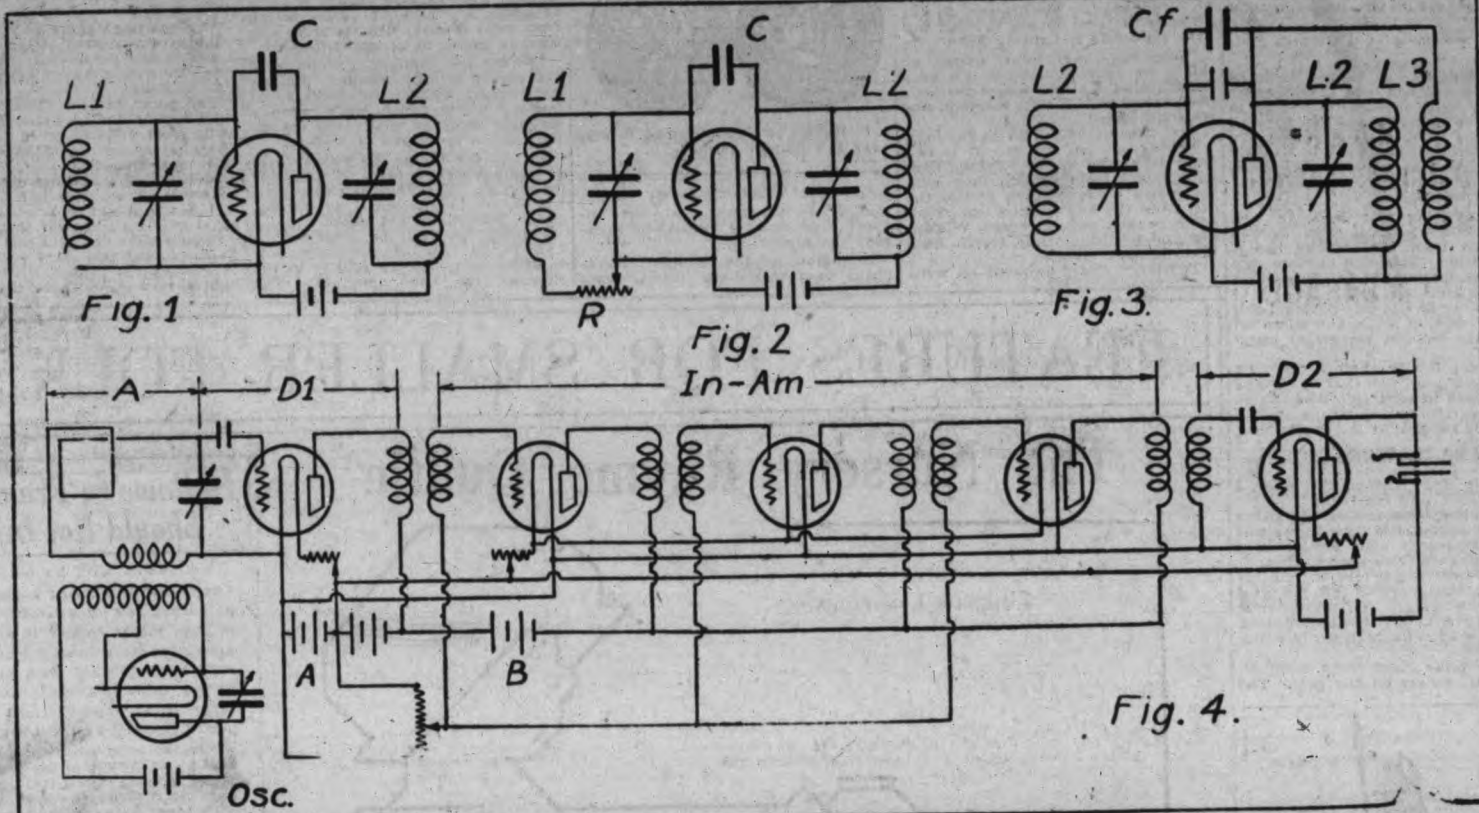

to do its work through Cf, which has been given the name "neutralizing condenser."

In actual practice a section of the winding of the secondary of the coupling transformer, which is closely coupled to the primary, is used as L-3, and produces the same results. The "neutralizing tap" on neutralizers is then what would be the top end of L-3 of Fig. 3.

Strange as it may seem, it is not desirable to totally nullify the effect

depends on what the radio-frequency amplifiers, better known as the "intermediate amplifiers," "in-Am," are set to. A popular figure is 3,000 metres, or 100,000 cycles. The oscillator is simply set then either to 3,000,000 cycles or to 300,000 cycles. Either frequency will give exactly the same result. This is why a station can be heard in more than one place on super-heterodynes.

After passing through the intermediate amplifiers the signal is a

The Critical Age of growth

From babyhood to adolescence is the time of growth—the time when the body is being built. The food must be such as will build muscle, nerve tissue and bone.

Viol is a food specially designed by Medical and Food Experts to meet the needs of growth. It is used regularly in 3,000 Infant Clinics, and prescribed by many thousands of Medical Men, because it builds the tissues and increases the defensive powers of the body against disease.

The remarkable power of Viol is seen at once in the improved condition of those who take it.

ville; WHB, at Kansas City, and many others.

But an interesting phase of broadcasting which is being developed is that which reaches the farmer, the man in the wheat fields, the corn fields and the potato valleys, who raises the crops for the world to eat.

Kansas was an early advocate of broadcasting, and the State College of Agriculture at Manhattan took up the work as a means of advancing college extension work, as the first college in the world to offer a definite course in radio. Through a twenty-mile remote control, the Brinkley Jones station at Millford, Kan., was utilized for the first season, which began with a five-week series on February 11, 1924. A second semester began on March 17. Courses covered many phases of agriculture and home economics. Related students whose interest was aroused after the course had begun, were allowed copies of lectures already given, in order to qualify for written examinations at the close of the term. And at the end of this first ten weeks' course on June 1, 400 diplomas were awarded to farmers and their families who had successfully completed the course.

The work was found to be on so firm a foothold that a new 500-watt station was begun on the campus at Manhattan, and is now rapidly nearing completion, budgeted by funds from the board of administration for broadcasting. The Fall college course will be broadcast from the home station, with college instructors at the microphones in their own laboratories.

The first college catalogue of subjects to be broadcast is now being published by the extension department of the college, under the direction of H. Umberger. Forty courses ranging from eight to sixteen weeks in length, touching agriculture, home economics and commerce, are catalogued and described in this booklet, which is soon to be ready for distribution.

The lectures have been carefully planned by the college department heads, under the supervision of President W. S. Harding, with the idea of crowding into eight fifteen-minute radio talks the most practical and essential facts and figures which can be covered in their regular college lecture courses.

A few departments have outlined their work on a four-year basis, making possible a longer, more comprehensive study of their respective subjects.

The short courses are scheduled for seasons of the year when the information will have most direct application. Lectures on baby chicks, canning, treating potato seed, marketing, insect control and similar timely subjects will be broadcast when the demand for such information is keenest. Under the head of timely topics, extension specialists will advise regarding control of disease epidemics in livestock and plants, marketing conditions and new farming facts as they are discovered.

Business men will have a selection of short courses in commercial law, public speaking, business English, advertising and other subjects. The housewife has her choice of eight courses on such subjects as infant care, millinery, household management and nutrition. General science subjects have been arranged for high school students.

The Kansas Agricultural College demonstrate to the world last winter that thousands of radio fans, tired of logging new call letters and listening to jazz were ready to settle down and improve their education.

A steady stream of communications from all sections of the United States commending the programme and the idea of offering free college courses by radio, poured into the extension division last winter.

The University of the Air has come to stay, the power for educational good to the man of the crowded city or the man who lives in more isolated regions. The man of town and country alike profits by the new radio WMAQ, Chicago; WHA, St. Louis; KDKA, Pittsburgh.

pretty strong one, so it is now ready to be fed to another detector tube and therein made audible. This is the "second detector," "D2." Standard audio transformers can be added, and usually are necessary.

The arrangements of the amplifying transformers and the tuning devices vary a great deal in super-heterodynes. Indeed, the super is by far the most interesting radio set a person can build, for there are so many things to look after. The circuit shown in Fig. 4 is practically a complete one, but the input and output transformers of the intermediate amplifier will vary in construction and design.

UNIVERSITY COURSES BEING BROADCAST ALL OVER WORLD BY RADIO

Practical Subjects Being Sent Out by Faculty Members of Universities

A few years ago many of the universities began their college courses by extension. The mails carried printed lectures and lessons to the man or woman in the far corners, and brought back answers and further queries. But there was always something still lacking in the mail train. The power of delivery, the class, the personality of the speaking instructor was not felt. Extension courses have been of great recognized value, but the coming of radio have not been wholly satisfactory.

Within the last year these same universities have seen the vision of radio as a potent educational factor. A broadcasting station, with school hours when the busy man or woman has time to listen with pad and pencil in hand, can carry the message of knowledge in quick delivery. These lessons are followed by printed details and symposiums of lessons, but the actual voice of the instructor carries the weight of informative education.

There are two distinct kinds of people for whom radio extension classes are made—the city man and the farmer. The city man or woman, whose education has not been completed during his busy days, listens in at night in his hall, bedroom or flat, or in a pretentious study of financial affluence the scholar listens to lectures which broaden his own scope of progressive learning, and learns from the classes broadcast through WEAF from the Columbia University faculty, the same lectures and instructions which are given in the night schoolroom. There are classes in literature, psychology, and the civil government, which are delivered by representative faculty members of Columbia. The listener is not rushed. He can and will leisurely assimilate what he hears to his best advantage.

The University of Pittsburgh conducts a radio school every Monday evening, completing accredited courses in extension radio work. Replies to Miss Helen Osterander, secretary of the radio classes, have come from every walk of life. The man who listens in his home to the great democracy of radio facts. Radio is a genuine leaven of caste. The listeners tune in for knowledge or they tune out, and, accordingly to the University of Pittsburgh, they do stay on the air each Monday evening through KDKA.

Away out on the Pacific Coast, the University of the State of Washington at Pullman has broadcast extension lectures. Special language classes have been broadcast through WMAQ, Chicago; WHA, St. Louis; KDKA, Pittsburgh.

Overland Sedan

97% SALES INCREASE

Proves Value Beyond Comparison

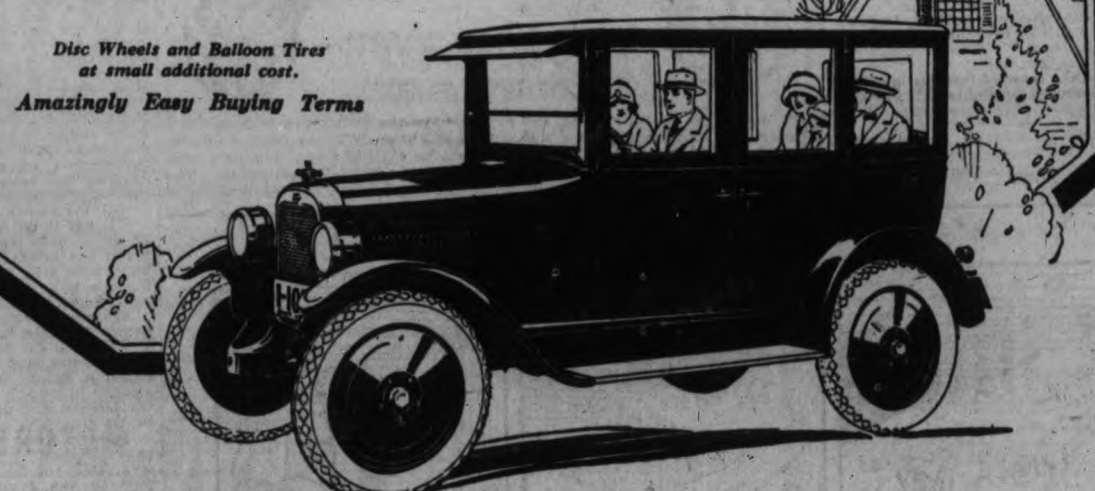

The Overland Sedan has lines and body fit to grace the most expensive car, interior fittings of the finest, deep downy cushions done in fine gray velour, the wonderful riding comfort of Triple Springs and an economy of operation and up-keep unsurpassed by any car at any price.

These and 23 other big-car advantages are the reasons for an increase in Overland Sedan sales of 97% over the same period in the biggest year in Willys-Overland history.

See and drive the Overland Sedan to-day. Step on it! and feel the surging power of the big Overland engine. Compare its lines, equipment, finish and full 5-passenger roominess with the most expensive cars, then you will realize the reason for this phenomenal sales increase.

Disc Wheels and Balloon Tires at small additional cost.

(radio frequency) circuit. The coil L-1 (Fig. 1) might be the secondary of an aerial tuning coil, or the secondary of a radio-frequency transformer in a multi-tube set; L-2 is the primary coil of the succeeding transformer. To secure the highest amplification from stage to stage it is necessary to tune the transformers to the wave length it is desired to listen on. This sounds simple enough; variable condensers across the respective coupling coils will do the work quite efficiently.

In tuning the coil L-2 in the plate circuit of the tube exactly the same effect is secured as by tuning the plate of the detector tube of an ordinary variometer regenerative set itself. In a regenerative set, therefore, a high grid plate capacity is an advantage, but in a radio-frequency amplifier it is very highly important that this capacity be kept down to the very lowest possible minimum. This is easy to appreciate if the effects of the feedback in a R. F. circuit are understood. The tuning coils and condensers of the coupling transformers comprise oscillating circuits, and the feedback action of the tubes throws these into strong oscillation. The result is the most horrible squealing and howling, due to unavoidable interaction between the circuits. The entire receiver then becomes unstable and absolutely useless. The lump capacity of the

stations very much. The trouble is aggravated by a similar effect between closely bunched grid and plate connection wires between the sockets and the various other instruments.

It is only natural to inquire why manufacturers do not make low capacity tubes. The answer is that they are doing their best, but as long as tubes have grids and plates there must be some capacity. In America radio-frequency circuits have come into prominence only in the last two years, and no tube on the market is really designed for R. F. work. In England, however, where the modest and highly efficient regenerative set never was popular, R. F. sets have always been the experimenters' playthings, and as a result the British have the best R. F. tubes in the world.

For broadcast reception, though, there is definite need for a stable and dependable radio-frequency set. Since the tubes themselves cannot be changed, all kinds of tricks must be resorted to to overcome the effects of the high capacity.

The simplest expedient is a resistance placed directly in series with the grid tuning circuit, where the ohmic oscillation is set up. This resistance actually makes the circuit so inefficient that the feedback current is absorbed or dissipated in its effects thereby overcome. This sounds very nice, but the resistance also makes the selectivity bad and causes distortion.

The second and by far the better class of oscillation limiting devices strikes directly at the source of the feedback and makes use of a system for preventing the feedback current from flowing at all.

The first circuit of this class is the one popularly known as the "super-heterodyne," but first disclosed by Hartley. In it a tickler coil is coupled against the grid coil and connected in series with the plate one of the radio-frequency tube. Its connections, however, are opposite to those of a regenerative set, so instead of producing regeneration its effect is to suppress it.

The second circuit uses "reversed capacitive feedback." This is nothing but a high-sounding name for the heterodyne, the most popular radio circuit ever devised. Here the compensating element (Fig. 2) is a small condenser, Cf, connected from the grid of the tube to one side of an auxiliary coil closely coupled to L-2, which is coupled against the grid of the R. F. transformer. The electrical constants and position of this coil, L-3, are such that across it is developed a voltage which just equals and opposes that produced in L-1 by the feedback caused by the tuning of the plate circuit. The extra and defeating current is carried back to L-1

itself. In a regenerative set, therefore, a high grid plate capacity is an advantage, but in a radio-frequency amplifier it is very highly important that this capacity be kept down to the very lowest possible minimum. This is easy to appreciate if the effects of the feedback in a R. F. circuit are understood. The tuning coils and condensers of the coupling transformers comprise oscillating circuits, and the feedback action of the tubes throws these into strong oscillation. DAILY RADIO PROGRAMMES

SATURDAY, OCT. 18

KPO—Hale Bros., San Francisco:

From 3:30 to 5:30 p.m.—Tea dinnant. E. Max Braddfield's Versatile Band playing in the Palace Hotel Room Room. From 5 to 7 p.m.—A. J. Weidner's Dance Orchestra playing in the Fairmont Hotel. This is the opening night of the California Industries Exposition. KPO will broadcast direct from the Auditorium. The soloists: the singing will be Harriet Merton, soprano, and H. Victor Vogel, bass.

KGO—General Electric Company, Oak-

land: 312 Metres.
From 4 to 5:30 p.m.—Concert Orchestra of Hotel St. Francis, San Francisco. Vinton La Ferrere conducting. At 5 p.m.—Studio programme.
From 10 p.m. to 1 a.m.—Dance music programme by the slatted Orchestra and soloists, Hotel St. Francis, San Francisco.
KGO—Morning Oregonian, Portland: 322 Metres.
At 10 p.m.—Dance music by George Olsen's Metropolitan Orchestra of Hotel Portland.

KFI—Earle C. Anthony Inc., Los Angeles: 468 Metres.

From 6:45 to 8 p.m.—Dance orchestra. From 8 to 9 p.m.—Tilda Rohr recital. From 9 to 10 p.m.—Classic concert presented by the Crittenden Conservatory of Music of Pomona.
From 10 to 11 p.m.—Packard Radio Club.
From 11 to 12 p.m.—Ambassador Hotel Coconut Grove Orchestra.
KJL—Los Angeles Times, Los Angeles: 295 Metres.

From 6 to 6:30 p.m.—Art Hick-

man's Concert Orchestra from the Rialto.
From 6:30 to 7:30 p.m.—Children's programme presenting Prof. Walter Sylvester Hertog telling stories of mermaid history, Yodel Day, screen juvenile. Bedtime story by Uncle John.
From 8 to 8:45 p.m.—One-act play, Edward Murphy directed by Howard Johnson.
From 8:45 to 10 p.m.—Programme presented through the courtesy of the Martin Music Co., arranged by J. Howard Johnson.
From 10 to 11 p.m.—Art Hickman's dance orchestra from the Biltmore Hotel.
Earl Burton, director.

A PAGE OF INTEREST TO CHILDREN

CHILD'S STORY OF THE HUMAN RACE By Uncle Ray

The warm and kindly sun—all of us love it and thank it for the light and heat it gives.

People of olden times noticed what the sun did for them. In many cases they bowed down and prayed before the "light of day."

In other cases, people thought there must be a god taking care of the sun. The Egyptians prayed to a sun-god called Re. The Greeks and Romans thought a god named Apollo had control of the sun.

The Germans also had a god of the sun. Different tribes had different names for this god. Some of his names seem to have been Phol, Falter, Baldar and Balder.

The last was used by Germans living in the north of Europe, in Nor-

Gehenna was a place for the wicked only. Jews who had quit their religion had to suffer there for a while, it was said. After that they could pass to a more pleasant place. When the Bible was written, the word Gehenna was written "hell." Where do you think it got that word?

From the name of a German goddess! That goddess was named Helia or Hel. She put her cold cruel fingers on every spirit which did not go to the Home of Heroes. From time to time, it is said, she rode about the country on a three-legged horse. Her business was to gather the dead. Sometimes she rode in a wagon instead of horseback.

Hel's dwelling was deep in the ground, under a great tree. It was very dark there, and spirits had a gloomy time. This evil goddess was always on the lookout for more souls to put in her black pit.

He was fair of face but mean of heart. He brought sorrow to many women.

Loki was finally chained up. Of course he did not like that at all, and he struggled to get free. When there was an earthquake Germans said: "Loki is tugging at his chains."

RINGS AND CLOTHING

"By the Holy ring on this altar, I swear I have said the truth." If you had been among the tribes of Europe about the time Rome was losing her power, you would have heard that oath from time to time.

The Franks had a love for glittering gold and most of all for gold made into rings. When anyone swore by a ring, it was smeared with blood of animals killed in honor of the gods.

Some of the rings were worn on the finger, others on the arm. The

"buckets" (made of animal skins) to a spring close by. This spring is unusual. Its water has a salt taste. There is much loud talking, perhaps some laughing and splashing. They take the water from the spring and carry it to the side of the bonfire.

By this time the fire is so big and hot they can hardly bear to get beside it, but they come as near as they can. They stand awaiting the signal.

Suddenly the chief raises his hand. "Let her go!" he cries.

All together, the men throw the water upon the blazing logs. There is loud puffing and spluttering and clouds of steam. The fire seems to be struggling to "keep alive." The struggle lasts a minute or two, but then the blaze is entirely gone.

"Why have they been doing all this?" we ask ourselves as we peep from behind the tree where we have been watching. Wait a moment, and we shall know.

See! The tribesmen go to the logs, which are coated white. It is salt from the spring water! Taking their long knives from slits in their skin or woollen clothing, they scrape the salt from the half-burned logs. They put it in their palms and jars. Whooping and shouting, they march back towards their village.

The story above is based on writ-

ings of a Roman who knew a great deal about the ways of these tribesmen. Some tribes may have found salt "ready made" at certain spots, but others had to do what we have told—or else go without salt on their meat.

COWS USED AS MONEY

Perhaps you have thought there never was any money except metal coins or paper bills. As a matter of fact, there have been many other kinds of money. At one time to-

Two sides of a coin used by Franks near the Roman border.

tobacco was widely used as money. Maybe you remember that the Indians used colored beads or "wampum" as money.

A number of the ancient Europeans used something much more

queer than tobacco or wampum—they used milk cows as money! Just think of it, the good old bossy cow grazes in green pastures and gives us milk, was once used as if she were just plain money.

Of course I don't mean the Franks cut cows into pieces and used the pieces as "coins." No, indeed! The cows were used while still alive.

One milk cow was worth three calves. A strong horse was worth a cow. A bull seven years old was worth "three times eighty" pounds of sheep's wool.

Cows were used as money by tribes far in the north. Tribes to the south of them used milk or cheese or cloth as money. The cloth was woven from wool or flax. Horses were also used as money by certain tribes.

Toward the south of Europe, near the border of the Roman Empire, were tribes which used coins as money. These coins were usually made by Romans, and came among the Franks by means of traders.

One of the things the Franks sold to Romans was amber. It was used for jewelry. The Romans also bought a breed of horses, small but strong, which the Franks had tamed.

I think you will be surprised to hear it, but the Franks knew how to make soap.

They sold it to the Romans in large amounts. The

Franks, like the Romans, were fond of bathing. The hard life of the north, and the skin clothing worn by so many tribesmen, made it wise to wash the body quite often.

While the Franks tribes were going into the lands of the Romans, they were often stopped by the findings of a warm spring. They spent days camping around such springs, splashing in the water and having "ready-made" hot baths.

WHEN SWORDS BOUGHT COWS

"Seven cows for a sword and scabbard!" That offer was often made among the Franks in days when they were winning power in France.

Perhaps you wonder why they were willing to pay such a big price for a sword and its holder. The reason was that iron was very scarce among Franks tribes.

The name of the Saxons (who went to England) is believed to have come from a Frank word for sword. "Saxons" is said to mean "the men with short swords."

Shields and lances were not worth so much as swords, but if a man had a shield and a good lance, he could get two cows for them.

Shields were usually made of tough wood. Sometimes there was a piece of iron at the centre. Lances were light spears. They were tipped with

Here are drawings of tips used by early Franks for lances or arrows. Several were taken from graves of warriors.

Iron-and were hurled at the enemy during battle.

The Frank warriors had the habit of making a great noise when they went into the fight. They yelled and shouted with all their might, holding their shields in such a way as to make the sound even louder.

From early youth, boys were trained to get ready for the time when they would go to battle. They threw small lances and learned to ride horseback.

Bows and arrows were used by them when they went hunting, but seldom in battle.

(Copyright, John F. Dille Co., Chicago.)

fun" failed to return it again. That was theft and a jail term could have followed, but beyond all that the little crippled girl lost her dearest plaything.

These are only a few examples of what evil sprites may do. It is obvious that they do not think of the suffering and loss their actions cause. All honor to those who find merriment in black cats, ghostly wraps, and apple dips for these are amusements that bring nothing but laughter and smiles.

Tears and frowns should bear no part in the festivities. It is a mean nature that could cause a moment's unnecessary sorrow to any living soul. Let us make it a "Happy" Halloween!

A Minute a Day Keeps Fire Away

Fire Prevention Week is over and for fifty-one weeks the fire hazard will not be brought to mind, unless it occurs in the shape of an actual fire with loss of property and maybe life. Yet need for care exists in the fifty-one remaining weeks just as surely as it does in the one week in the year when we keep fire hazards in mind.

Every Junior Reader of The Times could be his, or her, own fire marshal. There are certain matters that can be attended to around every home which would do much to keep accidental fire away. Collections of rubbish, with oily rags, and waste paper are apt to accumulate in the operation of the home, and yet these are the very materials upon which unbidden fire feeds.

Another source of danger lies in matches, and more than one case has been reported where mice caused fire

by chewing at the match sticks out of a box left in the cellar. Piles of lumber near a dwelling are another source of danger as more often than not fire may come from the dwelling and spread on any material exposed on your lot.

The habit of taking care with fire is one easily cultivated and one that will give greater cash returns than almost any other similar expenditure of time. Appoint yourself fire chief in your home. Ask your parents what you could do to make that home safer from the unbidden flames. Then go and do it. Not this week, or next week alone, but a little on every day through the 365 days of the year.

In this was you will be a partner in your father's business, a first rate assistant for your mother, and one of the best of citizens of this community. Fire knows no language, no station in life. It burns where it will, if you let it. Don't let it into your home, for it is but poor company.

BEDTIME STORY

Uncle Wiggily and the Snipe

Copyright, 1924, by McClure News-paper Syndicate

(By Howard R. Garis)

Uncle Wiggily was sitting, half asleep, in his hollow stump bungalow one day, when he heard a voice saying to him:

"You may come with me if you like, Uncle Wig!"

At first the rabbit gentleman thought this might be the Fox, the Wolf or the Bob Cat trying to trick him into going to one of their dens again, so the bunny cried:

"No, Bo! I don't want to go." "Oh, but if you will come with me I'll let you have half my lollypop," went on the voice. By this time Mr. Longears had opened his eyes and he saw Baby Bunty standing before him. "I'm so glad it's you, Bunty!" laughed the rabbit uncle. "I guess I was dreaming of the bad chaps. But where do you want me to come with you?"

"Let's go hippity hop to the lollypop shop!" sang Baby Bunty. "I have a penny to spend and an apple to buy some candy and I'll give you some."

"Thank you very much; I shall be delighted to go with you," spoke Uncle Wiggily with a low and polite

What's the matter? asked Uncle Wiggily.

how of his pink, twinkling nose. So away he hopped with Baby Bunty the little rabbit girl, over the fields and through the woods. They had not gone very far before, as they came near to an apple orchard, they heard a queer voice crying:

"Google-oogie-goo!" "Oh, goodness! Let's run!" said Bunty.

"No, it sounds like some one in trouble—we must help them," said Uncle Wiggily.

Looking around the corner of a tree, Uncle Wiggily saw, on the ground, a large bird, with a long, sharp slender beak. And the bill of the bird was stuck in a hard apple so that the bird could not get the apple off his beak, nor could he open his mouth.

"Who are you, and what's the matter?" asked Uncle Wiggily, though he guessed what had happened.

"Goo! Goo! Giggie! Goo!" was all the bird could answer, not being able to open his mouth.

"Oh, I see! You want me to take the apple off your beak," spoke the bunny. The bird nodded. "Yes," with his head and when the rabbit had pulled the apple off the bird opened his mouth and sang:

"There was a Fat Man from Bombay. He sat smoking his pipe one hot day. When a bird called a Snipe, flew away with his pipe, which vexed the Fat Man from Bombay."

"Oh, then you are a Snipe, I think," said the bunny.

"I am," was the answer, "and I thank you for taking that apple off my beak. It fell on my bill and stuck there as I was sleeping under the tree. You did me a favor and I hope some day I may do you one."

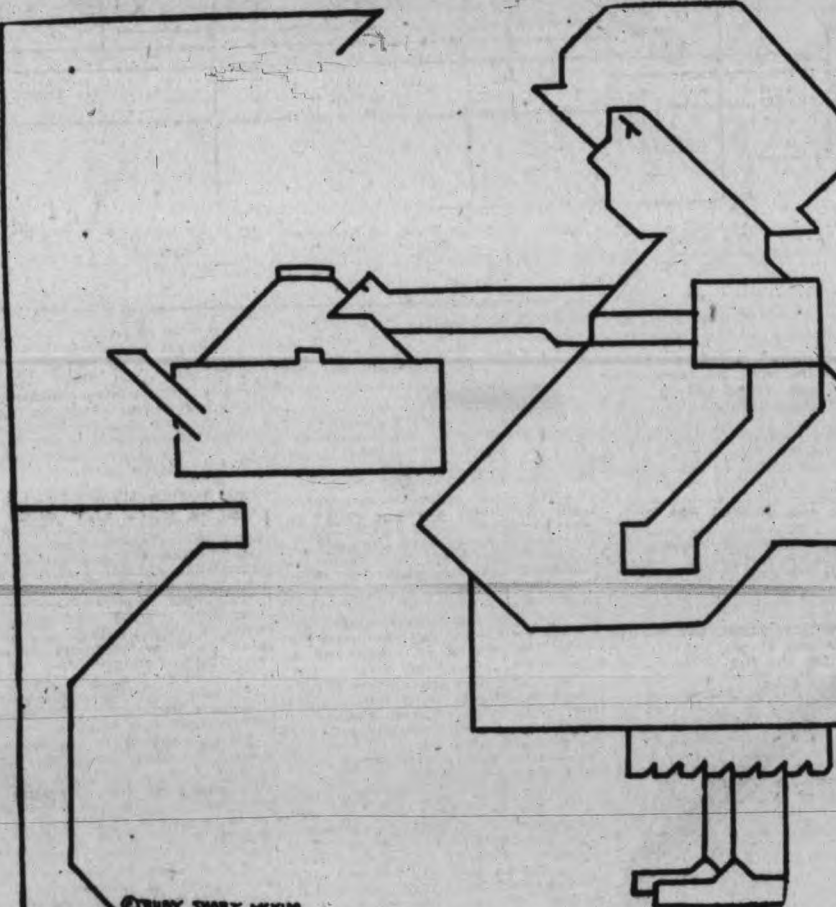

"Pray do not mention it," said Uncle Wiggily, politely. Then he and Baby Bunty hopped on to the lollypop store, and they were almost there when, all of a sudden, Bunty dropped her penny down a crack in the boardwalk.

"Oh, my penny is gone!" she cried. "I'll get it for you," suddenly called a voice, and along flew the bird called a Snipe. He thrust his long slender bill down the crack between the boards, and picked the penny up in his bill. The Snipe put the penny in Bunty's paw. "Now you can buy your lollypop," sang the bird. And away flew the Snipe to give back the pipe to the funny Fat Man from Bombay.

"Oh, goodie! Thank you, Mr. Snipe," laughed Bunty, and she gave her rabbit uncle a big lollypop, making him very happy. And if the feather duster doesn't fly away with the cake of soap when the gold fish wants to wash its face, I'll tell you next about Uncle Wiggily and the chestnut.

FEATURES FOR SMALLER FOLKS

The Nursery Rhyme Quiltie

STUDY STORY MYMIL

NUMBER 9.

Polly is a good, industrious, quiltie child. Of course it isn't much work to make a pot of tea. It isn't much work to make just one quilt block each week either, and then pretty soon all twenty will be done. Some quilts are being made with blue thread, some with red or pink and some are making them with floss on colored cloth. That sounds pretty, doesn't it?

A Flower Bracket

The department stores nowadays sell so many beautiful brass and pottery jars at a very low price that there is no excuse for any house not having a lovely hanging fern, provided there is a young carpenter at hand to make a nicely stained and waxed bracket from which to suspend it. It is not at all difficult to make as only three pieces of wood are required.

The back board is four by nine inches and should be about one-half inch thick. Three separate curves are used in marking out the board, but you can do that with a pencil and string. Cut the pattern with a key-hole saw and finish the edges smooth with plane and sandpaper. Plane a strip long enough to make the two pieces that project out, sawing off the one perfectly square and the other at a forty-five degree angle, so that the two will fit together properly. Fasten the upper one in place by nailing in through the back and then nail on the slanting brace, which operation will require a little care in order to keep from bending the top piece out of place.

Last Week's Who

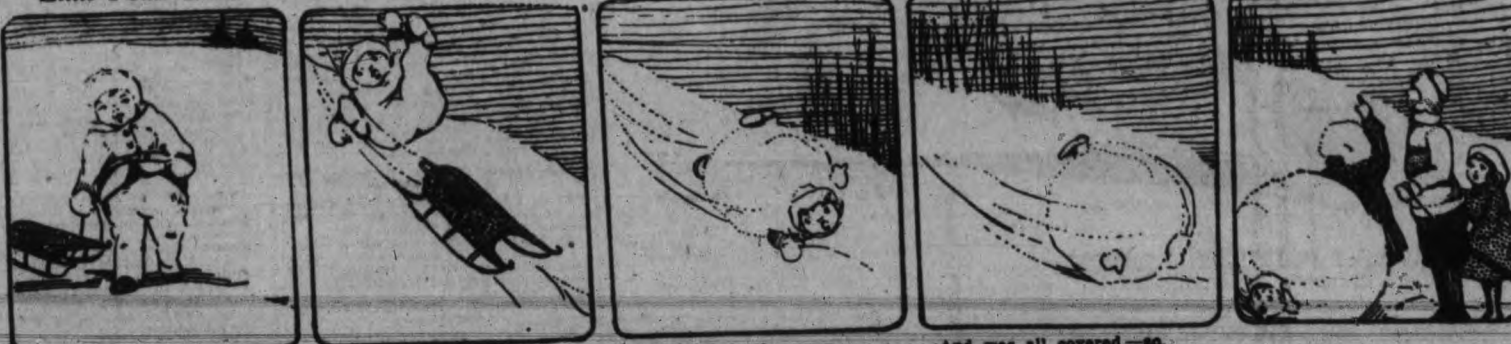

Finds Limerick Line

"An Esquimaux hopeful-Augloo Had Little or nothing to do; He pestered his Dad, Until he got mad. And then crawled into his igloo."

Contributed by Johanna Coutts, Age Ten Years, 1748 Second St., Victoria.

Frederick Fancett, eleven years of age, 1737 Haultain Street, found a similar line with "And then ran into his igloo."

Little Folks Limerick

Royal—"The Isle of Spice."
Coliseum—"Gaiety Girl."
Capitol—"Sinners in Heaven."
Columbia—"Barney London."
Playhouse—"Being Respectable."
Dominion—"Three Women."

and a company of Paramount players returned to New York from the Bahama Islands where scenes were being shot for "Sinners in Heaven," a new Alan Crosland production, it was discovered that every one had lost weight.

Miss Daniels was ten pounds lighter, Dix had lost fifteen pounds, Alan Crosland dropped twelve pounds, and other members of the company lost from five to twenty pounds in weight.

"You don't have to do a thing," explained Bebe. "The tropical sun just bakes the excess flesh away. I wasn't particularly anxious to lose weight but I did. As a place for reducing I'd say Nassau was the spot and I recommend it to anyone who wants to take off flesh fast and without much trouble or inconvenience, except a very hot sun."

However a loss of ten pounds did

not mar Miss Daniels' beauty, as you will be able to see for yourself if you visit the Capitol Theatre this week where "Sinners in Heaven" is the film attraction.

"BARMY LONDON" IS
SHOWING FOR LAST
TIME AT COLUMBIA

"Barmy London," now showing at the Columbia Theatre, is drawing good houses. Manager Clark says everyone who has seen it says it is one of the best pictures of the year. It has about everything one could wish for. There is not a dull moment in it. It has comedy, scenery, thrills and a good love story. It was produced in the great metropolis of London, the city of a million "blokes." The picture is produced on a big scale, being seven reels, super-fine length, and in the course of the story there is staged big London sporting spectacles, such as the horse race at Epsom Downs and two big bouts at the National Sporting Club.

SCENARIO WRITER
DESCRIBES WORK
OF FILM PLOTTING

Dorothy Farnum, telling of her film "Being Respectable," says: "I know only one way of development; how I started writing stories for the little magazines, then grew to writing originals for cheap releases. But no one can say whether a scenario is born or that one can be trained. Industry often breeds talent. The fates sometimes give you a power at one time in your life, that they withhold at another. It is an absolute mystery."

"We scenario writers are nothing but the stokers of a ship, necessary but pandered to the necessity of obscurity. But we do work so that the stars and directors will have a jolly time on deck."

"A scenario must have knowledge of literature, then throw it away for knowledge of life. She must feel what is screenable, as an artist

knows intuitively that certain people are not palatable."

"We work with words and without them. What we really do is to transmute thoughts into pantomime. More and more screen acting is to plant the idea with the face, and language will be used less and less."

"In 'Being Respectable' I had the problem of showing what happens to ordinary people who have been holding themselves in too long. There is flame in everyone of us, carefully stifled and held in check. But a volcano cannot be pent up; it may rest for years inactive and then presto! it erupts, inflicting untold damage and ruin. It was necessary for me to build up a situation where people such as you and I know in real life, and I hope those that see the picture will agree that my job has been well done."

"I have often asked myself this question. With our long struggle for success, are we ever to have a permanent place in literature—live as do the poets and novelists, or are we just to be remembered with no right to remembrance?"

"Being Respectable" is now showing at the Playhouse Theatre.

RALPH GRAVES WILL
BREAK A LANCE WITH
MacLAREN FORSOOTH!

One of the most spectacular scenes in "Yolanda," Marion Davies' feature, which will open on Monday at the Capitol Theatre for six days, is a duel on horseback between two armored knights. More than four thousand people take part in the scene. The combatants in the tournament are Ralph Graves, who appears as Prince Maximilian of Styria, and Ian MacLaren, who plays the part of Campo-Basso.

Four days of careful rehearsing were required to perfect this scene with its thrills and spills and many narrow escapes were experienced by the actors taking part in the mimic fray.

A special arena was constructed in the rear of the castle of Charles the Bold. This arena, almost a city block in area, was partly enclosed by a spectators gallery of three tiers. The tournament is held to determine the fate of Prince Maximilian, who had been imprisoned and sentenced to death, and who is given his freedom by Charles the Bold, at the request of Princess Mary, upon the condition that he fight a duel on horseback with his enemy Campo-Basso.

WEST HOLDS KEY TO GROWTH OF GREAT SELF-GOVERNING NATION

(Continued from page 21)

level declared that no one could deny that Mr. King had been a success as Premier.

"No one ever came to his high office better qualified than Mr. King," Mr. Ivel asserted. "His whole life fitted for his present task. In two years his Government was able to create a surplus of revenue over expenditure for the first time since the Liberal Party was in office before. This task was by no means easy with public utilities everywhere losing money, and a huge war debt with enormous interest charges.

"Any Government that can have a surplus in these times is on the road to prosperity."

PREMIER EXTENDS WELCOME

In welcoming Mr. King to B.C., Premier Oliver declared that the Liberal Party had made no mistake in choosing the present Prime Minister as successor to Sir Wilfrid Laurier. The Premier emphasized the difficulties which faced the Federal Government and the mastery fashion in which Mr. King was meeting them. Mr. Oliver extended to Mr. King the welcome of the people of B.C., "regardless of party."

FAIR PLAY URGED

Hon. H. B. McGovern, who was the first speaker, recalled that in his athletic days he had learned to play the "game hard but fairly." He hoped to carry that great maxim into his present position. "And in doing that," he added, "I want to tell you I am supporting a great leader. When he was in England at the Imperial Conference he charmed the Empire's statesmen with his speeches. He advocated

A BEAUTIFUL OAK BAY HOME FOR SALE

UNQUESTIONABLY one of the most desirable homes in the Municipality situated on a quiet street, in good neighborhood and close to the Oak Bay golf links and the sea. The house is almost new and in first-class condition, everything about the place being spotlessly clean and tidy. There are 8 bright rooms and large tiled bathroom, polished floors, etc. Full built-in features, including kitchen, built-in electric range, which will suit all the blinds and linoleum, will go with the house when sold. If you are looking for something "exceptionally nice" drop around and let us show you this charming home. Sale price \$14,000.

SWINERTON & MURGRAVE

Winch House, 610 Fort Street

What we have always advocated—an autonomous nation under the old Union Jack.

"The Empire's statesmen unanimously adopted those plans that he had advocated so that Canada could grow and develop as an autonomous nation in the Empire."

FORESEES PROSPERITY

Mr. McGovern declared that Canada was approaching that prosperity that it expects from a Liberal Party. He recalled that if the Liberal Government had continued in office for another year it would have piled up a current deficit of \$200,000,000. The King Government had reduced this deficit to \$90,000,000 in its first year of office, \$30,000,000 in its second year and then had created a surplus of \$35,000,000. Through careful administration the King Government had reduced the deficit to \$90,000,000 in its first year of office, \$30,000,000 in its second year and then had created a surplus of \$35,000,000.

TO SEE WEST'S PROBLEMS

"We have come West not on an ordinary political tour but to find out the needs of this great territory," Hon. J. H. King remarked. "I have been pressing at Ottawa for certain reforms for the West and I believe these things will be confirmed as a result of this tour."

"The policy of the present Government is not sectional, it is not narrow—it is broad and thoroughly national," Dr. King affirmed.

AT HOME IN WEST

Hon. P. J. A. Cardin, who speaks English fluently with a typical French-Canadian accent, declared that he welcomed the present opportunity to investigate conditions in

SNAP FOR QUICK SALE

CHOICE AIRFIELD, HIGH GROUND, TWO LOTS, TENNIS COURT, PRICE ONLY \$6500. This particular part of the Fairfield district is considered one of our residential locations. We offer for immediate sale, this thoroughly modern and attractively designed home of eight rooms, situated on two large lots, nicely laid out in flowers, shrubs and lawn. the West and see Western problems at first hand.

"It will be a great pleasure to me, when I return home, to tell them that a French-Canadian can be so at home and so heartily welcomed as I have been in British Columbia. We are in this beautiful city of Victoria."

Mr. Cardin declared emphatically that with the King Government there is no East, no West, there is only Canada. He said that he and his wife, who are both French-Canadians, have been in the West for some time and they are all very happy. They are doing their best to solve the problems of all this country. We have been accused in Montreal of closing 2,000 industries, the advantage of the West through our last budget, but in the St. Antoine Division of Montreal the people returned a Liberal. They are in the East that if they are to have prosperity the West must be prosperous.

CANADA AS A WHOLE

"The policy of the Government is to help Canada as a whole—to help the people and not the classes."

The Government, Mr. Cardin went on, was doing everything possible to assist agriculture, which must be one of the corner stones of the country's development. At the same time full opportunity must be given to legitimate industry.

"We do not call legitimate industries those whose capital has been taken from our woods or lakes nor those opened where there was no room for them," he said. "We are in the East that if they are to have prosperity the West must be prosperous."

"The policy of the present Government is not sectional, it is not narrow—it is broad and thoroughly national," Dr. King affirmed.

"We do not call legitimate industries those whose capital has been taken from our woods or lakes nor those opened where there was no room for them," he said. "We are in the East that if they are to have prosperity the West must be prosperous."

The Surprising Sex

By MILDRED BARBOUR—A "her of 'Love Stakes,' etc.

SUCCESS!

Anna Deniston arrived in Washington in the early winter. She had advised Blake of her coming and he was there to meet her. For several weeks, she had shopped assiduously in New York preparing herself for her onslaught against the Washington society. The results of her sojourn were evidenced in her vast assortment of luggage, which it was Blake's task to see to. He performed the irksome duty with the distance of the average man, and he recalled oddly how little trouble Julie had put him to under similar circumstances.

"So you and Julie have actually shirked in the early winter. She had advised Blake of her coming and he was there to meet her. For several weeks, she had shopped assiduously in New York preparing herself for her onslaught against the Washington society. The results of her sojourn were evidenced in her vast assortment of luggage, which it was Blake's task to see to. He performed the irksome duty with the distance of the average man, and he recalled oddly how little trouble Julie had put him to under similar circumstances."

"She didn't return to Cranston?"

"She took an apartment here in Washington," he said briefly.

"Poor little creature! Here in this beautiful city of Victoria."

"There is no East, no West, there is only Canada. He said that he and his wife, who are both French-Canadians, have been in the West for some time and they are all very happy. They are doing their best to solve the problems of all this country. We have been accused in Montreal of closing 2,000 industries, the advantage of the West through our last budget, but in the St. Antoine Division of Montreal the people returned a Liberal. GRACIA

CHESTER WANTS TO HEAR FROM ALL HIS LITTLE FRIENDS AND OF COURSE THAT MEANS YOU - HE WILL GIVE AWAY THREE BEAUTIFUL PRIZES FOR THE BEST LETTERS - JUST TELL CHESTER WHAT YOU WOULD LIKE TO HAVE FOR A PRESENT AND YOU MAY BE ONE OF THE LUCKY ONES - ADDRESS CHESTER GUMP - & THIS PAPER -

I WONDER WHY UNCLE BIM SAID FOR ME TO WEAR MY SAILOR SUIT TO-DAY -

GOOD MORNING -

GOOD MORNING, SIR - YOUR UNCLE WOULD LIKE TO SEE YOU IN THE LIBRARY, SIR, ON A MATTER OF VAST IMPORTANCE - THANK YOU SIR -

GEE, I WONDER WHAT UNCLE BIM WANTS - HE TOLD ME TO BE SURE TO WEAR MY SAILOR SUIT AND NOW HE WANTS TO SEE ME - I'LL BET HE IS GOING TO DO SOME OTHER NICE THING FOR ME - HE IS ALWAYS PLANNING SOMETHING TO MAKE ME HAPPY - I BELIEVE HE IS THE BEST UNCLE IN THE WORLD -

GOOD MORNING, UNCLE - SEE, I'M WEARING MY SAILOR SUIT -

GOOD MORNING, CHESTER - I TOLD YOU TO WEAR YOUR SAILOR SUIT BECAUSE I HAVE A LITTLE SURPRISE FOR YOU -

YOU WILL NEVER BE ABLE TO GUESS WHAT I HAVE FOR YOU TO-DAY -

YOU HAVE GIVEN ME SO MANY BEAUTIFUL PRESENTS I CAN'T THINK OF ANYTHING THAT A BOY COULD WANT THAT I HAVEN'T GOT - SO I GIVE UP - WHAT IS IT?

THIS IS THE SURPRISE I HAVE FOR YOU - A PRIVATE YACHT THAT IS ALL YOUR OWN -

THIS YACHT WILL BE AT YOUR SERVICE AT ALL TIMES TO TAKE YOU WHEREVER YOU DESIRE TO GO - YOU WILL ENJOY WATCHING THE NATIVES IN THEIR QUAIN DUG-OUT CANOES - IN SPITE OF THE SHARKS THAT INFEST THESE WATERS THE LITTLE NATIVE BOYS DIVE TO THE BOTTOM OF THE SEA AFTER PENNIES - I KNOW YOU'LL ENJOY WATCHING THEM - AND THEY'LL ENJOY THE PENNIES YOU CAST OVERBOARD -

THEY HAVE ALL DIVED FOR PENNIES EXCEPT THE KING - WHAT'S THE MATTER - CAN'T HE SWIM?

YES, THE KING IS THE CHAMPION SWIMMER AND DIVER BUT BEING A KING HE HAS TOO MUCH ROYAL DIGNITY TO DIVE FOR PENNIES - BUT I'LL TRY HIM WITH A DOLLAR -

LUNCHEON IS READY -

ON UNCLE - LET'S EAT - I NEVER WAS SO HUNGRY IN MY WHOLE LIFE - I HOPE WE HAVE SOMETHING NICE FOR LUNCH -

I HIRED A CHEF WHO'S SPECIALTY IS COOKING THINGS THAT LITTLE BOYS LIKE -

THIS IS SCRUMPTIOUS - YOUR CHEF COOKS ALMOST AS WELL AS MY MOTHER DOES - I'D LIKE TO GIVE A PICNIC ON THIS BOAT AND TAKE A CROWD OF POOR LITTLE BOYS ON A TRIP SO THEY COULD HAVE FUN EATING THIS SWELL STUFF -

YOU ARE A TRUE GUMP AND IF YOU WANT TO INVITE A LOT OF POOR BOYS REMEMBER THE YACHT IS YOURS -

UNCLE IS GOING TO GIVE ME A HYDROPLANE THAT WILL GO OVER A HUNDRED MILES AN HOUR AND WILL BE FITTED OUT LIKE AN OCEAN-GOING STEAM-SHIP - WHEN IT IS BUILT I WILL BE ABLE TO FLY FROM AUSTRALIA TO MY HOUSE IN FOUR OR FIVE DAYS - I BET THE KIDS IN MY NEIGHBORHOOD WOULD OPEN THEIR EYES IF THEY SAW ME COME FLYING DOWN OUT OF THE CLOUDS IN THE SWELLEST AIRSHIP IN THE WHOLE WORLD - AND WOULDN'T MY PAPA AND MAMA BE ASTONISHED?
